PROFESSIONAL SUMMARY

Senior Data Analyst with 8 years of experience designing and implementing data solutions across financial services and e-commerce sectors. I specialise in translating complex datasets into actionable business insights using Python, SQL, and Tableau. Known for taking ownership of end-to-end analytics projects and mentoring junior team members. Based in Bristol with a track record of delivering measurable improvements to operational efficiency and revenue growth.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavaultsolutions.io

Bristol, United Kingdom

March 2021 - Present

Developed and maintained 15+ automated reporting dashboards in Tableau that reduced manual reporting time by 25 hours per week across the finance department. Designed and implemented a customer segmentation model using Python and SQL that identified high-value customer cohorts, resulting in a targeted marketing campaign that increased retention by 18%. Led the migration of legacy data warehouse infrastructure from on-premises to AWS, coordinating with infrastructure and security teams to ensure zero downtime during transition. Mentored three junior analysts on SQL optimisation, statistical analysis techniques, and Tableau best practices, with two subsequently promoted to mid-level roles.

Data Analyst

Fintech Innovations Ltd

www.fintechinnovations.co.uk

London, United Kingdom

June 2018 - February 2021

Created advanced Excel models and SQL queries to analyse transaction patterns across 2 million daily user accounts, uncovering fraudulent activity patterns that led to implementation of new detection rules preventing GBP 500k+ in losses annually. Built interactive Power BI dashboards for executive leadership tracking KPIs across product performance, user acquisition, and churn metrics used in weekly board presentations. Conducted statistical analysis on A/B testing results for product features, providing data-driven recommendations that improved feature adoption rates by 22% on average. Automated 8 manual reporting processes using Python scripts, saving the team approximately 160 hours per year and enabling reallocation to higher-value analytical work.

Data Analyst

Retail Analytics Group

www.retailanalyticsgroup.net

Bristol, United Kingdom

September 2015 - May 2018

Analysed point-of-sale data and inventory systems to identify trends in customer purchasing behaviour, providing insights that shaped merchandising strategy for 45 retail locations. Supported the launch of new e-commerce platform by building SQL-based tracking systems to monitor transaction flows, conversion funnels, and customer journey metrics from day one. Produced weekly and monthly reports summarising sales performance, stock levels, and market trends, presenting findings to senior management and non-technical stakeholders. Established data quality standards and created validation procedures that improved accuracy of downstream analytics, reducing data-related issues reported by business users by 30%.

EDUCATION

BSc Statistics

University of Bristol

Graduated July 2015

TECHNICAL SKILLS

Databases: SQL, T-SQL, PostgreSQL, MySQL

Programming: Python (Pandas, NumPy, Scikit-learn), R

Visualisation: Tableau, Power BI, Excel (Advanced)

Cloud Platforms: AWS (S3, RDS, EC2), Azure

Tools: Git, Jira, SQL Server Management Studio

Statistical Methods: Hypothesis Testing, Regression Analysis, A/B Testing, Segmentation

Data Concepts: Data Warehouse Design, ETL Processes, Data Quality, Performance Optimisation

CERTIFICATIONS

Tableau Desktop Specialist Certification (2020)

AWS Certified Cloud Practitioner (2022)
