PROFESSIONAL SUMMARY

I'm a Senior BI Analyst with 7 years of experience building data solutions that actually get used by business teams. I've spent most of my career at mid-sized tech companies where I learned to translate messy operational data into dashboards and reports that drive real decisions. I'm strongest with SQL and Tableau, comfortable with Python for data manipulation, and I've recently picked up dbt for managing data transformations. I enjoy working closely with stakeholders to understand what they need rather than just building what they ask for.

WORK EXPERIENCE

Senior BI Analyst

DataFlow Solutions

www.dataflow-solutions.io

Bristol, United Kingdom

March 2022 - Present

Designed and deployed a new data warehouse architecture that reduced report generation time from 4 hours to 15 minutes, serving 60+ business users across finance and operations teams.

Built 25+ interactive Tableau dashboards covering sales performance, customer acquisition, and operational metrics, with monthly usage reaching 1200+ views across the organisation.

Created a Python-based data validation framework that automated quality checks on incoming datasets, catching 95% of data issues before they reached end users.

Mentored two junior analysts on SQL optimisation and dashboard design, and helped establish a peer review process for all new analytics work.

BI Analyst

Vertex Analytics Ltd

www.vertexanalytics.co

Bristol, United Kingdom

July 2019 - February 2022

Developed 15 new Power BI reports for the marketing and customer success teams, replacing manual spreadsheet processes and saving approximately 20 hours per week of manual work.

Wrote complex SQL queries to extract and transform data from PostgreSQL and MySQL databases, supporting ad-hoc analysis for C-level stakeholder requests.

Worked with the finance team to build month-end reporting automation in Excel and SQL, reducing the time to close from 5 days to 2 days.

Documented all data models and ETL processes in a central wiki, making it easier for new team members to understand the data infrastructure.

Business Analyst

StreamTech Solutions

www.streamtech.net

London, United Kingdom

August 2017 - June 2019

Gathered requirements from business stakeholders and translated them into technical specifications for data projects and system improvements.

Built and maintained dashboards in Qlik Sense for sales and supply chain teams, with emphasis on real-time tracking of key performance indicators.

Performed data reconciliation and root cause analysis on discrepancies between legacy systems, documenting findings in formal reports for management.

Supported the implementation of a new CRM system by mapping existing data structures and creating migration validation reports.

EDUCATION

BSc Business Analytics

University of Manchester

Manchester, United Kingdom

Graduated June 2017

TECHNICAL SKILLS

Database: SQL, PostgreSQL, MySQL, T-SQL

BI Tools: Tableau, Power BI, Qlik Sense

Programming: Python, VBA

Data Management: ETL, dbt, data warehousing, dimensional modelling

Other: Excel, Git, Google Analytics, Looker
