PROFESSIONAL SUMMARY

DevOps engineer with 5 years of hands-on experience building and maintaining cloud infrastructure across AWS and Kubernetes environments. I started my career deploying legacy systems and gradually shifted toward modern containerization and Infrastructure as Code practices. I'm most engaged when solving operational problems that directly improve team velocity, and I have a genuine interest in monitoring systems and incident response procedures.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, CloudFormation, Lambda), Azure (VMs, App Service)

Containerization: Docker, Kubernetes, Helm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Databases: PostgreSQL, MySQL, MongoDB

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Scripting Languages: Bash, Python, Go

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS), macOS

WORK EXPERIENCE

DevOps Engineer

TechVerse Solutions

techverse.io

Lisbon, Portugal

January 2023 - Present

Designed and implemented a Kubernetes cluster migration for 12 microservices, reducing infrastructure costs by 28 percent and improving deployment frequency from monthly to daily releases

Established comprehensive monitoring and alerting using Prometheus and Grafana, reducing mean time to detect incidents from 45 minutes to 8 minutes across production environments

Automated CI/CD pipelines using GitLab CI, cutting deployment time from 2 hours to 15 minutes and enabling 40 deployments per week with zero downtime

Built and maintained Infrastructure as Code using Terraform, managing 150 plus AWS resources and enabling consistent staging and production environments

Senior DevOps Engineer

CloudBridge Technologies

cloudbridge.net

Lisbon, Portugal

June 2021 - December 2022

Led infrastructure modernization project migrating from on-premises servers to AWS, managing 60 EC2 instances and reducing operational overhead by 35 percent

Implemented disaster recovery procedures with automated backup and failover mechanisms, achieving 99.95 percent uptime SLA across all critical systems

Mentored 2 junior engineers on Kubernetes best practices and containerization strategies, conducting weekly technical workshops on deployment patterns

Managed cost optimization initiatives including reserved instances and spot instances, resulting in 45 percent reduction in monthly AWS bills

DevOps Engineer

DataFlow Systems

dataflow.co

Lisbon, Portugal

April 2019 - May 2021

Containerized legacy monolithic applications into Docker containers and deployed them on Kubernetes clusters, reducing startup time from 12 minutes to 90 seconds

Developed custom monitoring dashboards and alerting rules for database performance, reducing query latency issues by 60 percent through proactive identification

Maintained and upgraded Jenkins infrastructure supporting 30 development teams, implementing security hardening and automated backup procedures

Wrote Ansible playbooks and Bash scripts for infrastructure provisioning, reducing manual server setup time from 8 hours to 30 minutes

EDUCATION

Bachelor of Science in Computer Science

University of Lisbon, Faculty of Sciences

Lisbon, Portugal

Graduated: June 2019
