PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building web applications and backend systems. I focus on writing clean, maintainable code and solving real problems for users rather than over-engineering solutions. Based in Stockholm, I've worked across the full stack with a preference for backend development and have shipped features that directly improved user workflows at my previous companies.

WORK EXPERIENCE

Senior Software Engineer

TechVenture Stockholm

techventure.io

Stockholm, Sweden

August 2022 - Present

Developed and maintained microservices architecture handling 2 million daily requests using Python and Go. Led the migration of a monolithic application to containerized services, reducing deployment time by 65 percent. Mentored 2 junior developers through code reviews and pair programming sessions on API design principles. Implemented comprehensive logging and monitoring infrastructure that reduced mean time to resolution for production incidents by 40 percent.

Software Engineer

DataFlow Systems

dataflow.co

Stockholm, Sweden

March 2021 - July 2022

Built RESTful APIs serving a React-based data visualization platform with 500 concurrent users. Optimized database queries and implemented caching strategies that improved page load times from 3.2 seconds to 1.1 seconds. Designed and deployed PostgreSQL schemas for analytics pipelines processing 50GB of data monthly. Wrote automated tests achieving 78 percent code coverage and established CI/CD pipelines using Docker and GitLab.

Junior Software Engineer

Webcraft Solutions

webcraftsolutions.net

Stockholm, Sweden

June 2019 - February 2021

Developed full-stack features for an e-commerce platform built with Node.js and React, contributing to 15 major releases. Created REST endpoints for product management and order processing systems handling thousands of daily transactions. Fixed bugs and improved code quality across the codebase while learning software engineering fundamentals. Collaborated with product managers to translate requirements into technical specifications and implementation plans.

EDUCATION

Bachelor of Science in Computer Science

KTH Royal Institute of Technology

Stockholm, Sweden

2015 - 2019

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, SQL, TypeScript, Bash

Frontend: React, HTML5, CSS3, Redux

Backend: Node.js, Django, REST APIs, gRPC

Databases: PostgreSQL, Redis, MongoDB

DevOps and Tools: Docker, Kubernetes, GitLab CI/CD, GitHub, Nginx, Linux

Testing: pytest, Jest, Mocha, unit testing, integration testing

Other: Git, API design, microservices architecture, agile methodologies
