PROFESSIONAL SUMMARY

Machine Learning Engineer with 10 years of experience building production ML systems that have processed billions of data points across finance, healthcare, and e-commerce sectors. I specialise in designing scalable neural networks and leading technical teams through complex model deployments. Most recently, I've focused on reducing inference latency by 60% and mentoring junior engineers through their first production deployments.

WORK EXPERIENCE

Staff Machine Learning Engineer

DataVault Analytics

www.datavault-analytics.io

Birmingham, United Kingdom

March 2022 - Present

Led the design and implementation of a distributed machine learning platform serving 15 terabytes of daily data for 40+ enterprise clients across EMEA region. Reduced model inference latency from 850ms to 340ms through quantization and architectural optimization, directly improving customer retention by 12%. Established ML governance framework and monitoring systems that reduced production incidents by 68% across all deployed models. Mentored team of 5 junior engineers in best practices for feature engineering, model validation, and deployment pipelines using Kubernetes and Apache Airflow.

Senior Machine Learning Engineer

Insight Financial Systems Ltd

www.insightfinancial.co.uk

London, United Kingdom

June 2018 - February 2022

Developed and deployed three major credit risk models processing 2 million loan applications annually, generating £8.2 million in additional revenue through improved approval accuracy. Built end-to-end ML pipeline for fraud detection using gradient boosting that achieved 94.7% precision and reduced fraudulent transactions by 31%. Implemented automated retraining system that monitored model drift and triggered updates when performance degraded below thresholds, eliminating manual intervention. Collaborated with compliance and risk teams to ensure all models met FCA regulatory requirements and maintained detailed audit trails for model decisions.

Machine Learning Engineer

TechCore Solutions

www.techcore.io

Birmingham, United Kingdom

September 2014 - May 2018

Created recommendation engine using collaborative filtering and deep learning that increased average order value by 18% for e-commerce platform serving 500,000 monthly active users. Developed computer vision pipeline for quality assurance manufacturing process achieving 96% defect detection accuracy using convolutional neural networks. Optimized training infrastructure reducing model training time from 72 hours to 8 hours through

distributed computing with Spark and GPU acceleration. Conducted research and prototyping of emerging techniques including attention mechanisms and transformer architectures for time series forecasting applications.

EDUCATION

PhD Computer Science (Machine Learning)

University of Birmingham

Birmingham, United Kingdom

2010 - 2014

BSc Computer Science with Honours

University of Bristol

Bristol, United Kingdom

2006 - 2010

TECHNICAL SKILLS

Programming Languages: Python, Scala, SQL, Java, R

Machine Learning Frameworks: TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM, Keras

Data Processing: Apache Spark, Pandas, NumPy, Polars, Dask

Databases: PostgreSQL, MongoDB, Elasticsearch, DynamoDB, Redis

Cloud Platforms: AWS (SageMaker, EC2, S3), Google Cloud Platform, Azure ML

DevOps and Deployment: Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform

Deep Learning: Neural Networks, CNNs, RNNs, LSTMs, Transformers, GANs, Attention Mechanisms

ML Operations: MLflow, Weights and Biases, Model Registry, Feature Stores, Data Versioning

Statistical Analysis: Hypothesis Testing, A/B Testing, Time Series Analysis, Bayesian Methods

Computer Vision: Image Classification, Object Detection, Semantic Segmentation, OCR

NLP: Text Classification, Named Entity Recognition, Embeddings, Language Models
