PROFESSIONAL SUMMARY

I'm a BI Analyst with a genuine passion for turning raw data into actionable insights. After completing my degree in Data Science, I spent the last year working in analytics roles where I've developed strong skills in SQL and Tableau. I enjoy working with stakeholders to understand their business problems and building dashboards that actually get used. I'm looking to grow further in a role where I can take on more complex data projects.

TECHNICAL SKILLS

Data Analysis and Visualization: Tableau, Power BI, Excel

Databases: SQL Server, MySQL, PostgreSQL

Programming: Python, R

Tools and Platforms: Google Analytics, Looker, Jira

Other: Data modelling, ETL processes, statistical analysis

WORK EXPERIENCE

Junior BI Analyst

DataViz Solutions Ltd

www.dataviz-solutions.co

Oxford, United Kingdom

June 2023 - Present

Developed and maintained 12 Tableau dashboards tracking KPIs across sales and marketing departments, reducing reporting time by 5 hours per week

Created SQL queries to extract and transform data from PostgreSQL databases for monthly stakeholder reports

Collaborated with business teams to gather requirements and translated them into actionable dashboard specifications

Identified a data quality issue in the customer database that prevented accurate revenue reporting and worked with IT to resolve it

BI Intern

Analytics First Ltd

www.analyticsfirst.io

Oxford, United Kingdom

March 2023 - May 2023

Assisted in building Power BI reports to track marketing campaign performance across multiple channels

Cleaned and validated datasets using Python scripts, improving data accuracy by identifying and documenting 47 duplicate records

Created documentation for 8 existing SQL queries to help other team members understand the data processes

Supported the senior analyst in presenting quarterly business intelligence findings to senior management

Data Analyst (Placement Year)

Oxford Retail Group

www.oxfordretail.net

Oxford, United Kingdom

September 2022 - June 2023

Built Excel dashboards using pivot tables and VLOOKUP functions to monitor store performance metrics for 15 locations

Performed ad-hoc analysis on customer transaction data using SQL to answer specific business questions from department heads

Trained 6 store managers on how to access and interpret basic performance reports in Excel

Conducted monthly data quality audits on point-of-sale systems and documented findings in Jira for the IT team

EDUCATION

BSc Data Science

University of Oxford

Oxford, United Kingdom

Graduated June 2023

Grade: 2:1
