PROFESSIONAL SUMMARY

I'm a Frontend Engineer with 14 years of experience building user-facing applications for startups and established companies across Europe. I've led frontend architecture decisions on large-scale projects, mentored junior developers, and maintained codebases that serve millions of users monthly. My focus has always been on writing clean, performant code while creating interfaces that users actually enjoy using.

WORK EXPERIENCE

Staff Frontend Engineer

TechVision Solutions

techvision.io

Madrid, Spain

March 2021 - Present

Led the frontend architecture redesign for our main product, migrating from AngularJS to React with TypeScript, improving page load times by 35 percent.

Established and maintained coding standards, conducted code reviews for a team of 8 frontend developers, and created comprehensive documentation for internal tools and libraries.

Designed and built a component library from scratch that reduced development time across teams by 40 percent and became the standard for UI consistency.

Mentored 4 junior developers through their career progression, with two being promoted to senior positions within 18 months.

Senior Frontend Engineer

Digital Creative Group

digitalcreative.net

Barcelona, Spain

June 2017 - February 2021

Built and optimized a customer-facing dashboard using Vue.js and Redux that handled real-time data updates for 50,000+ active users daily.

Reduced bundle size by 45 percent through code splitting, lazy loading, and removing unused dependencies, resulting in significantly faster load times on mobile networks.

Implemented automated testing infrastructure using Jest and Cypress, increasing test coverage from 25 percent to 78 percent across the frontend codebase.

Collaborated with UX and product teams to transform design mockups into fully functional, responsive interfaces across web and mobile platforms.

Junior to Mid-Level Frontend Engineer

Innovatech Solutions S.L.

innovatech.co

Madrid, Spain

September 2010 - May 2017

Developed responsive websites using HTML5, CSS3, and jQuery for clients in retail, finance, and healthcare sectors.

Transitioned the team's workflow from manual testing to continuous integration using Jenkins, reducing deployment bugs by 60 percent.

Refactored legacy jQuery code into modular components using Angular, improving maintainability and enabling faster feature development.

Worked directly with backend developers using REST APIs and later GraphQL to integrate frontend applications with server-side services.

EDUCATION

Bachelor of Science in Computer Science

Universidad Politecnica de Madrid

Madrid, Spain

Graduated: June 2010

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend Frameworks: React, Vue.js, Angular

State Management: Redux, Vuex, Context API

Build Tools: Webpack, Vite, npm, Yarn

Testing: Jest, Cypress, React Testing Library, Mocha

Version Control: Git, GitHub, GitLab

APIs: REST, GraphQL, WebSockets

CSS: Sass, Tailwind CSS, CSS-in-JS

Performance Optimization: Web Vitals, Lighthouse, Bundle Analysis

Responsive Design: Mobile-first, Flexbox, CSS Grid

Browser DevTools and Debugging
