PROFESSIONAL SUMMARY

I'm a junior DevOps engineer based in Barcelona with 2 years of hands-on experience building and maintaining cloud infrastructure. I started as a systems administrator and transitioned into DevOps after realizing I enjoyed automating repetitive tasks and solving deployment problems. I work well in fast-paced environments and I'm always looking to learn from more experienced engineers around me.

TECHNICAL SKILLS

Cloud Platforms: AWS, Google Cloud Platform, Azure basics

Containerization: Docker, Docker Compose, Kubernetes basics

Infrastructure as Code: Terraform, CloudFormation

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Scripting: Bash, Python

Monitoring: Prometheus, Grafana, CloudWatch

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MySQL, MongoDB basics

Operating Systems: Linux Ubuntu, CentOS, macOS

Other: Apache, Nginx, RabbitMQ, Ansible basics

WORK EXPERIENCE

Junior DevOps Engineer

TechFlow Solutions

techflow.io

Barcelona, Spain

March 2023 - Present

Managed AWS infrastructure for microservices applications supporting 15+ services across EC2, RDS, and S3 using Terraform for infrastructure automation.

Built and maintained CI/CD pipelines with GitLab CI that reduced deployment time from 45 minutes to 12 minutes for the development team.

Implemented centralized logging solution using ELK stack for application monitoring which helped developers reduce debugging time by 30 percent.

Responded to production incidents and created runbooks to prevent recurrence, achieving 99.8 percent uptime during my tenure.

DevOps Technician

CloudBase Infrastructure

cloudbase.net

Barcelona, Spain

September 2022 - February 2023

Deployed and managed containerized applications on Kubernetes clusters supporting the platform's transition from monolithic to microservices architecture.

Automated server provisioning and configuration management using Ansible reducing manual setup time from 2 hours to 15 minutes per server.

Monitored application performance and infrastructure health using Prometheus and Grafana dashboards that alerted the team to issues before users reported them.

Collaborated with the security team to implement container scanning and vulnerability assessments in the CI/CD pipeline.

Systems Administrator

Digital Services BCN

digitalservices.co

Barcelona, Spain

June 2021 - August 2022

Managed Linux servers and network infrastructure supporting 50+ company applications and services across on-premises and cloud environments.

Performed regular backups and disaster recovery testing ensuring business continuity and meeting 24-hour recovery time objectives.

Troubleshoot and resolved infrastructure issues including server outages, network connectivity problems, and database performance bottlenecks.

Documented infrastructure changes and created technical guides for the team improving knowledge sharing and onboarding for new staff members.

EDUCATION

Bachelor of Science in Computer Science

Universitat Autònoma de Barcelona

Barcelona, Spain

2017 - 2021

GITHUB REPOSITORIES

github.com/marcovila/terraform-aws-vpc-setup

Repository containing reusable Terraform modules for deploying VPC infrastructure on AWS with security groups and NAT configurations.

github.com/marcovila/docker-compose-local-dev

Docker Compose setup for local development environment with PostgreSQL, Redis, and application containers for rapid development iteration.

github.com/marcovila/kubernetes-deployment-guide

Kubernetes manifests and Helm charts for deploying microservices applications with automated scaling and health checks.

github.com/marcovila/bash-automation-scripts

Collection of bash scripts for common DevOps tasks including log parsing, server health checks, and automated backup routines.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services

Issued: February 2023
