PROFESSIONAL SUMMARY

I'm a frontend engineer with five years of experience building user interfaces that actually work well. I've spent the last few years helping teams ship features faster by improving our build processes and mentoring junior developers. I enjoy the problem-solving aspect of performance optimization and take pride in writing code that other people don't dread maintaining.

WORK EXPERIENCE

Senior Frontend Engineer

Nexus Digital AB

Stockholm, Sweden

nexus-digital.io

January 2023 - Present

Migrated our legacy Angular application to React, reducing bundle size by 40% and improving initial load times from 4.2 seconds to 1.8 seconds across all devices. Implemented a shared component library that standardized our UI patterns across four different product teams and reduced component development time by approximately 30%. Established code review standards and automated testing requirements that caught 60% more bugs before they reached staging environments. Mentored two junior developers through their first year, conducting weekly pairing sessions and helping them grow from writing basic components to owning entire feature areas.

Frontend Developer

CloudSync Solutions

Stockholm, Sweden

cloudsync.net

July 2021 - December 2022

Built and maintained the customer dashboard using React and Redux, which handled daily active users in the thousands without significant performance issues. Redesigned the authentication flow which reduced support tickets related to login problems by 45% and improved user satisfaction scores in that area. Wrote comprehensive unit tests and integration tests that brought overall code coverage from 35% to 72% within six months. Collaborated with the design team to implement a complete design system refresh, translating Figma designs into reusable components that improved consistency across the platform.

Junior Frontend Developer

TechFlow Studios

Stockholm, Sweden

techflow.co

March 2019 - June 2021

Developed responsive web applications using HTML5, CSS3, and vanilla JavaScript, meeting all accessibility requirements and ensuring compatibility across modern browsers. Implemented interactive data visualizations using D3.js that helped customers better understand their analytics and reduced support requests for data interpretation. Fixed over 200 bugs identified through user feedback and monitoring tools, learning to prioritize

issues based on impact and frequency. Participated in daily standups and sprint planning sessions, gradually taking on more complex tasks and learning how the team worked together on larger initiatives.

EDUCATION

Bachelor of Science in Computer Science

KTH Royal Institute of Technology

Stockholm, Sweden

Graduated June 2019

SKILLS

Frontend Technologies: React, Vue.js, HTML5, CSS3, JavaScript, TypeScript, Redux, Vuex

Build Tools and Bundlers: Webpack, Vite, Babel, NPM, Yarn

Testing Frameworks: Jest, React Testing Library, Cypress, Mocha

Styling Solutions: SASS, CSS Modules, Styled Components, Tailwind CSS

Version Control: Git, GitHub, GitLab

Performance Optimization: Web Vitals, Code Splitting, Lazy Loading, Image Optimization

Responsive Design: Mobile-First Development, CSS Grid, Flexbox

API Integration: REST APIs, Fetch API, Axios, GraphQL basics

Development Tools: VS Code, Chrome DevTools, Figma, Jira, Confluence
