PROFESSIONAL SUMMARY

Experienced frontend engineer with 6 years building user-facing applications for fintech and SaaS companies. I specialize in React and modern JavaScript tooling, with a strong focus on performance optimization and accessible component design. I've led frontend initiatives from architecture phase through production deployment, and mentored junior developers on best practices. I enjoy solving complex UI problems and working closely with designers to translate mockups into smooth, responsive experiences.

TECHNICAL SKILLS

JavaScript ES6+, TypeScript, React, Vue.js, HTML5, CSS3, SCSS, Tailwind CSS, Webpack, Vite, Redux, Context API, Next.js, REST APIs, GraphQL, Git, Jest, React Testing Library, Cypress, Chrome DevTools, Figma collaboration, Responsive design, Web accessibility WCAG 2.1, Performance optimization, SEO fundamentals

WORK EXPERIENCE

Senior Frontend Engineer

TechFlow SaaS

techflow.io

Paris, France

March 2022 - Present

Led frontend architecture redesign for main dashboard, improving Core Web Vitals scores by 42% through code splitting and lazy loading implementation. Established component library standards and maintained documentation, reducing development time for new features by 30%. Mentored 2 junior developers on React patterns, testing strategies, and code review best practices. Implemented dark mode toggle system and accessibility audit fixes, achieving WCAG 2.1 AA compliance across all customer-facing interfaces.

Frontend Engineer

FinanceSync

financesync.net

Paris, France

July 2020 - February 2022

Built responsive transaction dashboard using React and Redux, handling real-time data streams from WebSocket connections for 50,000+ active users. Migrated legacy jQuery components to modern React architecture in 8-week sprint, improving page load times by 38%. Developed comprehensive test suite using Jest and React Testing Library, achieving 85% code coverage and reducing production bugs by 25%. Collaborated with backend team to optimize GraphQL queries, reducing API response time from 800ms to 200ms average.

Junior Frontend Engineer

Digital Innovations Co

digitalinnovations.co

Lyon, France

September 2018 - June 2020

Created responsive landing pages and marketing sites using HTML5, CSS3, and vanilla JavaScript, ensuring mobile-first design principles. Implemented Webpack configuration for production builds and set up automated testing pipeline using GitHub Actions. Fixed cross-browser compatibility issues in IE11 and older Safari versions, manually testing on BrowserStack. Assisted senior developers in building reusable UI components, documenting patterns in internal design system wiki.

EDUCATION

Master of Science in Computer Science, Software Engineering Specialization

Universite Claude Bernard Lyon 1

Lyon, France

Graduated: June 2018

Bachelor of Science in Computer Science

Universite Claude Bernard Lyon 1

Lyon, France

Graduated: June 2016

GITHUB REPOSITORIES

github.com/mariedubois/react-accessible-dashboard - Complete dashboard application with accessibility features, Redux state management, and comprehensive test suite using Jest and Cypress.

github.com/mariedubois/component-library - Reusable React component library with Storybook documentation, TypeScript support, and visual regression testing.

github.com/mariedubois/performance-toolkit - Web performance optimization utilities including image optimization, lazy loading helpers, and Core Web Vitals monitoring.

github.com/mariedubois/graphql-client - Custom GraphQL client wrapper with caching strategy, request batching, and offline support for React applications.
