PROFESSIONAL SUMMARY

I'm a backend engineer with 5 years of experience building scalable APIs and distributed systems. I've spent the last few years working with microservices architectures and have a strong foundation in Python and Go. I enjoy solving complex performance problems and mentoring junior developers when I get the chance.

WORK EXPERIENCE

Senior Backend Engineer

TechVision Labs

techvision.io

Madrid, Spain

March 2023 - Present

Designed and implemented a microservices migration strategy that reduced API response times by 40 percent across the platform.

Built event-driven systems using Apache Kafka to handle 500K+ daily events with guaranteed delivery and minimal latency.

Led the implementation of automated testing infrastructure with 85 percent code coverage using pytest and CircleCI.

Mentored 2 junior backend engineers on REST API design patterns and helped them complete their first production deployments.

Backend Engineer

DataStream Solutions

www.datastreamsolutions.com

Madrid, Spain

July 2021 - February 2023

Developed REST APIs using Django and Django REST Framework that served 2 million daily requests for a financial analytics platform.

Optimized PostgreSQL queries and implemented Redis caching strategies that improved dashboard load times from 4 seconds to 800 milliseconds.

Collaborated with the DevOps team to containerize applications using Docker and manage deployments on AWS ECS clusters.

Implemented authentication and authorization systems using JWT tokens and wrote comprehensive API documentation using OpenAPI specifications.

Junior Backend Engineer

Innovate Software

innovate.co

Madrid, Spain

June 2019 - June 2021

Built and maintained Python backend services using Flask that processed customer data for a SaaS platform serving 50+ enterprise clients.

Participated in code reviews and contributed to establishing coding standards and best practices across the team.

Created database schemas and migrations for PostgreSQL while ensuring data integrity and optimal query performance.

Debugged production issues and implemented monitoring solutions using ELK stack for better visibility into system health.

EDUCATION

Bachelor of Science in Computer Science

Universidad Autónoma de Madrid

Madrid, Spain

Graduated: June 2019

TECHNICAL SKILLS

Languages: Python, Go, SQL, JavaScript

Frameworks and Libraries: Django, Flask, FastAPI, SQLAlchemy

Databases: PostgreSQL, MongoDB, Redis

Cloud and DevOps: AWS, Docker, Kubernetes, CircleCI, GitHub Actions

Message Queues: Apache Kafka, RabbitMQ

Tools and Platforms: Git, Linux, Postman, DataDog

Methodologies: Microservices Architecture, RESTful API Design, Test Driven Development
