PROFESSIONAL SUMMARY

Backend engineer with 2 years of experience building scalable APIs and microservices in Python and Node.js. I enjoy solving complex problems and writing clean, maintainable code. I've worked across fintech and e-commerce sectors, focusing on database optimization and API performance. Currently looking to deepen my expertise in cloud infrastructure and distributed systems while contributing to challenging technical problems.

WORK EXPERIENCE

Software Engineer

TechVenture Solutions

Bristol, United Kingdom

www.techventuresolutions.io

March 2023 - Present

Developed and maintained 8+ REST APIs handling 50,000+ daily requests using Python Flask and PostgreSQL.

Implemented Redis caching layer that reduced database query load by 35% and improved response times from 800ms to 200ms.

Collaborated with frontend team on API contract design and led code reviews for 3 junior developers, providing technical mentorship.

Wrote comprehensive unit and integration tests achieving 78% code coverage using pytest and wrote documentation for 6 internal API endpoints.

Junior Backend Developer

ByteFlow Commerce

Leeds, United Kingdom

www.byteflowcommerce.net

August 2022 - February 2023

Built order processing microservice in Node.js that handled 10,000+ transactions daily with zero downtime during deployment.

Migrated legacy monolithic payment system to event-driven architecture using RabbitMQ, reducing coupling between services.

Debugged production issues in payment pipeline affecting customer checkouts and implemented monitoring alerts using Prometheus.

Participated in database migration from MySQL to PostgreSQL, creating migration scripts and data validation procedures.

Junior Developer Intern

CloudNine Digital

Bristol, United Kingdom

www.cloudninedigital.co

June 2022 - July 2022

Developed CRUD endpoints for customer management API using Express.js and MongoDB under supervision of senior engineer.

Fixed 12 bugs in existing codebase identified through QA testing and deployed fixes to staging environment.

Created database schema for user authentication system and wrote basic unit tests for authentication middleware.

Attended daily standups and participated in sprint planning for 2-week development cycles.

EDUCATION

BSc Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2022

Grade: 2:1

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks: Flask, Express.js, FastAPI

Databases: PostgreSQL, MongoDB, MySQL

Tools and Platforms: Git, Docker, AWS, Linux

Other: REST APIs, RabbitMQ, Redis, Pytest, Postman
