PROFESSIONAL SUMMARY

I'm a DevOps engineer with five years of hands-on experience building and maintaining cloud infrastructure for fast-growing tech companies. I've spent most of my career automating deployment pipelines, reducing manual processes, and helping development teams ship faster. I'm comfortable with AWS and Kubernetes but prefer getting things done over chasing the latest trends. Based in Birmingham and always keen to solve infrastructure problems that actually matter to the business.

WORK EXPERIENCE

DevOps Engineer

CloudVenture Solutions Ltd

cloudventure.io

Birmingham, United Kingdom

March 2022 - Present

Designed and implemented a multi-environment Kubernetes cluster handling 15+ microservices, reducing deployment time from 45 minutes to 8 minutes for the development team.

Built CI/CD pipelines using GitLab CI and Jenkins that increased release frequency from monthly to daily deployments across three product lines.

Established comprehensive monitoring and alerting infrastructure with Prometheus and Grafana, cutting incident response time from 30 minutes to under 5 minutes.

Managed AWS infrastructure including EC2, RDS, and S3 resources for five different applications, optimizing costs by 28% through reserved instances and right-sizing analysis.

Senior Infrastructure Technician

Digital Stream Media Ltd

www.digitalstreammedia.co.uk

Birmingham, United Kingdom

July 2020 - February 2022

Migrated legacy on-premises servers to AWS, managing the transition of 12 applications with zero unplanned downtime during the six-month project.

Automated infrastructure provisioning using Terraform, reducing the time to spin up new environments from two weeks to less than two hours.

Implemented Docker containerization across the development workflow, enabling 40+ developers to work in consistent development environments.

Established disaster recovery procedures and tested them quarterly, achieving a documented RTO of 4 hours and RPO of 30 minutes.

Operations Support Engineer

Nexus IT Solutions

nexusit.net

Coventry, United Kingdom

September 2018 - June 2020

Supported Linux and Windows servers across 8 client environments, managing infrastructure for companies ranging from 20 to 500 employees.

Deployed and maintained backup solutions using Veeam, ensuring daily backups were completed and tested for 45+ virtual machines.

Documented infrastructure diagrams and created runbooks for common operational tasks, reducing time to resolution for routine issues by 35%.

Collaborated with clients to plan infrastructure upgrades and capacity planning, resulting in five successful server refreshes with minimal disruption.

EDUCATION

Bachelor of Science in Computer Science

Aston University

Birmingham, United Kingdom

2015 - 2018

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, Lambda, VPC), Google Cloud Platform

Containerization: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: GitLab CI, Jenkins, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Scripting Languages: Bash, Python, PowerShell

Version Control: Git, GitLab, GitHub

Databases: PostgreSQL, MySQL, Redis

Networking: VPCs, Load Balancing, DNS, SSL/TLS

Operating Systems: Linux (Ubuntu, CentOS), Windows Server
