PROFESSIONAL SUMMARY

I'm a Business Intelligence Analyst with 14 years of hands-on experience building data solutions that help organizations make better decisions. I've spent most of my career designing data warehouses, creating dashboards, and turning raw data into actionable insights for C-level executives and operational teams. I work best when I can combine technical depth with a strong understanding of business problems, and I take pride in delivering solutions that actually get used.

WORK EXPERIENCE

Staff BI Analyst

DataViz Solutions ApS

www.dataviz-solutions.io

Copenhagen, Denmark

March 2019 - Present

Designed and maintained a centralized data warehouse serving 40+ business users across finance, operations, and marketing departments, reducing report generation time from 2 hours to 15 minutes.

Led the migration of legacy reporting systems to a modern cloud-based analytics platform, managing stakeholder communication and ensuring zero downtime during the transition.

Mentored three junior analysts on data modeling best practices and SQL optimization, with two promoted to Senior Analyst positions within the organization.

Developed 25+ interactive Tableau dashboards for KPI tracking, revenue analysis, and customer segmentation, directly supporting quarterly business reviews with executive leadership.

Senior BI Analyst

Insight Nordic AS

www.insight-nordic.net

Aarhus, Denmark

June 2015 - February 2019

Built and optimized ETL processes using Talend, processing 50GB+ of daily transaction data from multiple ERP systems with 99.8% uptime.

Created fact and dimension tables for a dimensional data warehouse supporting 150+ analytical reports across the organization.

Implemented data quality checks and monitoring dashboards that reduced reporting errors by 68% and eliminated manual data validation tasks.

Collaborated with business analysts to translate requirements into technical specifications, delivering 12+ major reporting initiatives on schedule and within budget.

BI Analyst

Nordic Analytics Group

Copenhagen, Denmark

January 2010 - May 2015

Wrote complex SQL queries and stored procedures to extract insights from transactional databases, supporting ad hoc analysis requests from marketing and sales teams.

Designed and deployed Power BI reports for regional sales teams, enabling real-time visibility into performance metrics and pipeline health.

Assisted in the implementation of a new data warehouse project, contributing to schema design and initial data mapping across 8 source systems.

Documented technical specifications and created training materials for business users, ensuring smooth adoption of new reporting tools and reducing support tickets by 40%.

EDUCATION

Master of Science in Computer Science

IT University of Copenhagen

Copenhagen, Denmark

Graduated June 2010

Bachelor of Science in Information Systems

Copenhagen Business School

Copenhagen, Denmark

Graduated June 2008

TECHNICAL SKILLS

Databases: SQL Server, PostgreSQL, Oracle, MySQL

Data Warehousing: Dimensional modeling, ETL design, data quality frameworks

BI Tools: Tableau, Power BI, Qlik Sense, SAP BusinessObjects

Programming Languages: SQL, Python, VBA, DAX

Cloud Platforms: AWS Redshift, Google BigQuery, Azure SQL Database

ETL Tools: Talend, SSIS, Apache Airflow

Data Visualization: Advanced dashboard design, storytelling with data

Other Tools: Git, Excel (advanced), Jira, Confluence
