PROFESSIONAL SUMMARY

I'm a Senior BI Analyst with 8 years of hands-on experience building data warehouses and analytics platforms that actually get used. I started as a junior analyst doing basic reporting and worked my way up to designing and implementing enterprise BI solutions. I've spent the last three years at a fintech company where I reduced our reporting infrastructure costs by 40% while improving data freshness from daily to hourly updates. I prefer getting things right over getting them fast, and I'm most interested in roles where data drives real business decisions.

WORK EXPERIENCE

Senior BI Analyst

DataFlow Solutions GmbH

<https://www.dataflow-solutions.io>

Berlin, Germany

August 2021 - Present

Designed and implemented a cloud-based data warehouse using Snowflake and dbt that consolidated data from 15 different source systems for a 200-person fintech company.

Built 40+ interactive dashboards in Tableau and Looker that reduced monthly reporting time from 3 weeks to 2 days for the finance and marketing teams.

Established a data governance framework including metadata management, documentation standards, and access control policies that improved data literacy across the organization.

Mentored two junior analysts on SQL optimization, data modeling best practices, and wrote internal training materials that are still being used for onboarding.

BI Analyst

InsightHub AG

<https://www.insighthub.de>

Berlin, Germany

March 2018 - July 2021

Created ETL pipelines using Talend that processed 500 million records daily from e-commerce platforms and advertising networks into a centralized data mart.

Developed a customer segmentation model using Python and SQL that identified high-value customers, helping the marketing team increase campaign ROI by 35%.

Designed and maintained a suite of operational dashboards in Qlik Sense for the sales and operations teams, providing real-time visibility into KPIs across 8 regional offices.

Participated in the migration from on-premise SQL Server to cloud infrastructure on Microsoft Azure, managing data validation and testing for 50+ critical reports.

Junior BI Analyst

TechConsult Berlin

<https://www.techconsult.net>

Berlin, Germany

June 2016 - February 2018

Built and maintained SQL Server databases and created hundreds of standard and ad-hoc reports using SQL and Excel for 12 different client organizations across manufacturing and retail sectors.

Learned and implemented business intelligence fundamentals including star schema design, fact and dimension tables, and slowly changing dimensions for a retail analytics project.

Automated monthly reporting processes that previously required manual effort, saving approximately 40 hours per month across the team.

Documented data lineage and created data dictionaries for internal use, improving consistency in how metrics were calculated across different departments.

EDUCATION

Diplom in Wirtschaftsinformatik (Diploma in Business Information Systems)

Humboldt University of Berlin

Berlin, Germany

Graduated: May 2016

TECHNICAL SKILLS

Data Warehouse and ETL: Snowflake, dbt, Talend, Microsoft SQL Server, Azure Data Factory, Python for data processing

Business Intelligence and Visualization: Tableau, Looker, Qlik Sense, Power BI, Excel (advanced)

Programming and Data Analysis: SQL (advanced), Python (intermediate), Git, Jupyter Notebooks, pandas, NumPy

Cloud Platforms: Microsoft Azure, Amazon AWS, Google Cloud Platform (basic)

Data Modeling: dimensional modeling, normalization, slowly changing dimensions, star schema design

Databases: SQL Server, PostgreSQL, Snowflake, MySQL

Other Tools: Jira, Confluence, Figma for data visualization mockups, Airflow basics

LANGUAGES

German: Native

English: Fluent

French: Basic conversational
