PROFESSIONAL SUMMARY

Full stack engineer with 10 years of experience building and maintaining scalable web applications across fintech and SaaS sectors. I've led technical decisions on architecture migrations, mentored junior developers, and shipped features that serve millions of users. I work best when solving complex backend problems while staying hands-on with frontend implementations.

WORK EXPERIENCE

Senior Full Stack Engineer

DataSync Solutions

datasync.io

Manchester, United Kingdom

March 2021 - Present

Led architecture redesign of monolithic payment processing system into microservices, reducing latency by 40 percent and improving deployment frequency from quarterly to weekly releases.

Designed and implemented event-driven notification service handling 500k daily events, integrating with RabbitMQ and PostgreSQL for reliable message delivery.

Mentored team of 4 junior engineers through code reviews and technical pairing sessions, establishing code standards and best practices across the platform.

Owned full lifecycle of customer analytics dashboard feature from requirements gathering through production support, improving user retention metrics by 18 percent.

Full Stack Engineer

Meridian Financial Services

meridianfs.co.net

London, United Kingdom

June 2017 - February 2021

Built REST APIs in Python and Node.js supporting mobile banking platform used by 200k active customers, handling real-time transaction processing and regulatory compliance requirements.

Developed React-based internal admin panel enabling support team to resolve customer issues 60 percent faster through improved visibility into transaction states.

Implemented automated testing framework increasing code coverage from 35 percent to 82 percent, reducing production incidents related to regressions by 70 percent.

Collaborated with DevOps team to establish CI/CD pipelines using GitLab and Docker, enabling developers to deploy changes multiple times per day with confidence.

Software Developer

TechStart Innovations

techstart.io

Manchester, United Kingdom

September 2014 - May 2017

Developed full stack features for e-learning platform serving 50k students, working across PHP backend and jQuery frontend to deliver features on tight deadlines.

Created data migration scripts handling legacy system transitions, ensuring zero data loss across multiple database transfers affecting customer records.

Optimised database queries and implemented caching strategies reducing average page load times from 3.2 seconds to 0.8 seconds.

Participated in on-call rotation providing production support, troubleshooting live issues and implementing hotfixes within agreed SLAs.

EDUCATION

MEng Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: July 2014

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL

Frontend: React, Vue.js, HTML5, CSS3, Redux, Tailwind CSS
