PROFESSIONAL SUMMARY

I'm a junior software engineer based in Zurich with just over a year of hands-on experience building web applications. I started my career working with modern JavaScript frameworks and have picked up Python along the way. I enjoy solving real problems for users and learning from more experienced developers on my team. My background includes freelance projects and internships that gave me exposure to full development cycles.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL

Frontend: React, Vue.js, HTML5, CSS3

Backend: Node.js, Express.js, Django

Databases: PostgreSQL, MongoDB

Tools: Git, Docker, GitHub, VS Code

Other: REST APIs, Linux, Agile/Scrum

WORK EXPERIENCE

Junior Full Stack Developer

TechFlow Solutions

<https://www.techflow.io>

Zurich, Switzerland

August 2023 - Present

Built and maintained React components for a customer dashboard application used by over 500 active users

Implemented backend endpoints in Node.js and Express to handle user authentication and data retrieval from PostgreSQL

Debugged and fixed production issues in both frontend and backend code, reducing page load times by 30 percent

Participated in daily stand-ups and sprint planning meetings, collaborating with a team of four other developers

Frontend Developer Intern

Digital Bridge AG

<https://www.digitalbridge.ch>

Zurich, Switzerland

February 2023 - July 2023

Developed responsive web pages using React and Tailwind CSS according to design specifications from Figma

Fixed 45 bugs reported by QA team and end users, improving overall application stability

Assisted senior developers with code reviews and learned Git workflow practices through pair programming sessions

Created reusable UI components that were adopted by the design system and used across three different projects

Junior Web Developer

StartupHub Ventures

<https://www.startuphub.io>

Zurich, Switzerland

September 2022 - January 2023

Freelance contract developing static websites and simple web applications for small businesses and startups

Built a booking system using vanilla JavaScript and a Python Flask backend that processed 200 reservations monthly

Handled client communication and requirements gathering for four separate projects

Deployed applications on shared hosting and managed basic server maintenance tasks

EDUCATION

Bachelor of Science in Computer Science

University of Zurich (UZH)

Zurich, Switzerland

Graduated: June 2022

GPA: 3.7/4.0

GITHUB REPOSITORIES

<https://www.github.com/marcusweber/react-task-manager>

React-based task management application with local storage and drag-and-drop functionality

<https://www.github.com/marcusweber/python-weather-api>

Weather application using Python and OpenWeatherMap API with data visualization

<https://www.github.com/marcusweber/expense-tracker>

Full stack expense tracker built with React frontend and Node.js backend with PostgreSQL

<https://www.github.com/marcusweber/portfolio-website>

Personal portfolio website featuring responsive design and smooth animations

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued: March 2023
