PROFESSIONAL SUMMARY

I'm a staff frontend engineer with 14 years of experience building user interfaces that people actually enjoy using. I've spent the last decade working on large-scale applications where performance and code quality matter just as much as visual polish. My approach is pragmatic - I solve real problems rather than chase trends, though I keep up with what's genuinely useful in the ecosystem. I mentor junior developers and help shape technical decisions that affect our entire frontend architecture.

WORK EXPERIENCE

Staff Frontend Engineer

Zenith Digital

www.zenithdigital.com

Stockholm, Sweden

March 2020 - Present

Led the redesign of our core dashboard component library, reducing bundle size by 35 percent and cutting initial load time from 4.2 seconds to 1.8 seconds across all applications.

Mentored five junior engineers, conducting weekly code reviews and establishing frontend best practices that improved deployment quality and reduced production incidents by 40 percent.

Architected a micro-frontend solution that allowed three independent teams to deploy features without coordinating releases, increasing deployment frequency from twice monthly to multiple times weekly.

Redesigned the authentication flow from outdated session-based to modern JWT with refresh tokens, improving security posture while maintaining backward compatibility for existing users.

Senior Frontend Engineer

Catalyst Systems

catalyst-systems.io

Stockholm, Sweden

August 2015 - February 2020

Owned the complete rewrite of our customer portal using React and TypeScript, reducing technical debt and enabling new features that generated 22 percent more engagement within six months.

Built a comprehensive design system with 85 reusable components that cut implementation time for new features by 50 percent and improved consistency across all seven company products.

Implemented automated performance testing in our CI pipeline that caught regressions before production, reducing user-facing slowdowns by 80 percent across quarterly releases.

Established frontend monitoring infrastructure using error tracking and synthetic monitoring, which provided visibility into real user issues and reduced time to resolution from hours to minutes.

Frontend Developer

Nordic Creative Agency

www.nordiccreative.se

Stockholm, Sweden

June 2010 - July 2015

Built responsive websites and web applications using jQuery and later early versions of React, working with 12 different clients ranging from startups to enterprises in the financial sector.

Collaborated with UX designers and backend developers to implement pixel-perfect designs while maintaining clean, maintainable code that other developers could actually understand and work with.

Optimized website performance for clients in competitive industries, implementing techniques like lazy loading and code splitting that improved conversion rates by an average of 18 percent.

Mentored two junior developers in modern web standards and frontend development practices while managing daily client communications and project timelines.

EDUCATION

Master of Science in Computer Science

Royal Institute of Technology (KTH)

Stockholm, Sweden

Graduated June 2010

TECHNICAL SKILLS

JavaScript, TypeScript, React, Vue.js, HTML5, CSS3, Webpack, Vite, Git, Node.js, REST APIs, GraphQL, Next.js, Testing libraries (Jest, Vitest, React Testing Library), Accessibility standards (WCAG), Performance optimization, CSS-in-JS solutions, Component design, Responsive design, Web performance analysis, Agile methodologies
