PROFESSIONAL SUMMARY

Full Stack Engineer with 2 years of hands-on experience building web applications using React and Node.js. I'm passionate about writing clean, maintainable code and learning from more experienced developers. I've worked across the full development lifecycle from database design to frontend implementation, and I'm particularly interested in improving application performance and user experience. Currently based in Edinburgh and looking to deepen my expertise in scalable system design.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frontend: React, Redux, Vue.js, Tailwind CSS

Backend: Node.js, Express.js, Python Flask

Databases: PostgreSQL, MongoDB, MySQL

Tools and Platforms: Git, Docker, AWS S3, Firebase, Postman

Testing: Jest, React Testing Library, Pytest

Other: RESTful APIs, Agile/Scrum, Linux command line

WORK EXPERIENCE

Full Stack Developer

TechFlow Solutions Ltd

www.techflow.io

Edinburgh, United Kingdom

June 2023 - Present

Developed and maintained 5+ full stack features for a SaaS platform serving financial institutions, working with React on the frontend and Node.js with Express on the backend

Implemented responsive user interfaces using React and Tailwind CSS, improving page load times by 35% through code splitting and lazy loading

Designed and optimized PostgreSQL database schemas for 3 major features, reducing query execution time from 2.5s to 340ms

Collaborated with 4 team members using Git and participated in daily standups and sprint planning, deploying code to production twice weekly

Junior Developer

Meridian Digital Agency

www.meridian-digital.co

Edinburgh, United Kingdom

January 2023 - May 2023

Built 8 custom website projects using React and Node.js for clients in hospitality and retail sectors, delivering on time and within scope

Created reusable component libraries with documentation, reducing development time on subsequent projects by 20%

Fixed and debugged 40+ reported issues in production environments, maintaining 99.2% uptime across client applications

Wrote unit tests using Jest and React Testing Library, achieving 75% code coverage on 2 major feature modules

Junior Full Stack Developer

CodeBridge Startup

codebridgestartup.net

Edinburgh, United Kingdom

July 2022 - December 2022

Contributed to a mobile-first web application built with React and Firebase, supporting 15,000+ active users

Implemented 6 backend API endpoints using Express.js and MongoDB, handling user authentication and data validation

Assisted in deploying applications to AWS S3 and CloudFront, learning the fundamentals of cloud infrastructure

Participated in code reviews and received feedback that improved my understanding of software architecture and best practices

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2022

Grade: 2:1 Upper Second Class Honours

PROJECTS AND REPOSITORIES

github.com/jreidstewart/react-expense-tracker

Full stack personal finance application built with React, Node.js, and PostgreSQL. Users can log expenses, set budgets, and view spending analytics. Deployed to Heroku with JWT authentication.

github.com/jreidstewart/weather-dashboard

Weather forecasting web app using React and the OpenWeather API. Features include location search, 5-day forecasts, and local storage for saved locations. 2.3k GitHub stars.

github.com/jreidstewart/ecommerce-api

RESTful API built with Express.js and MongoDB for a small ecommerce platform. Includes product management, user authentication, and order processing with full test coverage using Jest.

github.com/jreidstewart/task-management-tool

Collaborative task management application using React, Redux, and Firebase. Real-time updates, user authentication, and task filtering functionality.
