PROFESSIONAL SUMMARY

Data analyst with 4 years of experience turning raw data into actionable insights for e-commerce and fintech companies. I'm comfortable working across the full analytics stack, from SQL queries and Python scripts to creating dashboards that stakeholders actually use. I started my career in support roles but moved into analytics because I found myself naturally asking the right questions about data patterns. I work best when I can partner with business teams to understand what they really need to know.

WORK EXPERIENCE

Senior Data Analyst

DataFlow Solutions

Amsterdam, Netherlands

dataflow.io

January 2023 - Present

Designed and maintained 15+ Tableau dashboards for product and marketing teams, reducing manual reporting time by 12 hours per week

Built Python scripts to automate data quality checks and anomaly detection across 8 million daily transactions

Conducted cohort analysis on customer retention that identified a pricing segment responsible for 60% of churn

Mentored two junior analysts on SQL optimization and statistical methods for A/B testing

Data Analyst

FinTech Connect

Amsterdam, Netherlands

fintech-connect.net

June 2021 - December 2022

Created SQL-based ETL processes to consolidate data from 6 different source systems into a centralized warehouse

Analyzed payment patterns and fraud indicators, contributing to a 23% reduction in false positive fraud alerts

Built statistical models in Python to forecast monthly transaction volumes with 94% accuracy

Presented weekly data insights to senior leadership on KPI performance and business metrics

Junior Data Analyst

eCommerce Insights Ltd

Rotterdam, Netherlands

ecommerceinsights.co

August 2019 - May 2021

Supported cross-functional teams by extracting and cleaning datasets using SQL and Python pandas

Created pivot tables and exploratory analyses that informed product decisions affecting 50,000 monthly users

Documented data lineage and developed data dictionaries for 25+ internal datasets

Learned fundamentals of statistical analysis and began building dashboards in Google Data Studio

EDUCATION

Bachelor of Science in Business Analytics

University of Amsterdam

Amsterdam, Netherlands

Graduated June 2019

TECHNICAL SKILLS

SQL: Advanced proficiency with complex queries, window functions, and query optimization

Python: Data manipulation with pandas and numpy, statistical analysis with scipy and statsmodels

Data Visualization: Tableau, Google Data Studio, matplotlib

Databases: PostgreSQL, MySQL, Google BigQuery

Microsoft Excel: Advanced formulas, pivot tables, VLOOKUP, INDEX-MATCH

Statistics: Hypothesis testing, A/B testing, regression analysis, cohort analysis

Version Control: Basic Git and GitHub workflows

Cloud Platforms: Google Cloud Platform basics, BigQuery

LANGUAGES

Dutch: Native

English: Fluent

German: Conversational
