PROFESSIONAL SUMMARY

I'm a frontend engineer with 12 years of experience building user interfaces that people actually enjoy using. I've spent the last decade working primarily with React and TypeScript, but I'm equally comfortable with backend work when needed. I care about code quality and mentoring junior developers, which has become more important to me than chasing the latest framework trends. Based in Zurich, I'm looking for roles where I can contribute to meaningful products while helping shape engineering practices.

CORE TECHNICAL SKILLS

JavaScript, TypeScript, React, Vue.js, Next.js, HTML5, CSS3, SASS, Webpack, Vite, Redux, GraphQL, REST APIs, Jest, Cypress, Git, Docker, AWS, PostgreSQL, Node.js, Web Performance Optimization, Accessibility Standards, Figma

PROFESSIONAL EXPERIENCE

Staff Frontend Engineer

Nexus Digital GmbH (www.nexus-digital.io)

Zurich, Switzerland

March 2021 - Present

Led the frontend architecture redesign for a data visualization platform used by 50,000+ financial analysts across Europe, resulting in a 40% reduction in page load times and improved user engagement metrics. Established coding standards and best practices across 8 frontend engineers, conducting regular code reviews and pair programming sessions to elevate team capabilities. Mentored 3 junior developers through structured 1-on-1 meetings, helping 2 of them advance to mid-level positions within 18 months. Migrated the legacy Angular codebase to a modern React and TypeScript stack over 6 months while maintaining zero downtime for production services.

Senior Frontend Engineer

TechVision AG (www.techvision.ch)

Zurich, Switzerland

June 2017 - February 2021

Built and maintained the customer-facing web application for a SaaS platform serving 200+ enterprise clients, working with Next.js and implementing server-side rendering for improved performance and SEO. Reduced bundle size by 35% through code splitting and lazy loading optimization, which directly improved conversion rates by 8% during A/B testing. Implemented comprehensive accessibility improvements bringing the platform to WCAG 2.1 AA compliance, expanding our addressable market to include users with disabilities. Collaborated with UX designers and backend engineers to establish GraphQL patterns that reduced API calls by 60% and improved developer experience across teams.

Frontend Engineer

Catalyst Solutions Ltd (www.catalyst-solutions.net)

Zurich, Switzerland

September 2012 - May 2017

Developed responsive web interfaces for 15+ client projects using jQuery, Bootstrap, and vanilla JavaScript before transitioning the team to React in 2015. Created a reusable component library that standardized UI patterns across all projects and reduced development time by 25% for new features. Implemented automated testing with Jest and Cypress, increasing test coverage from 15% to 78% and catching regressions before they reached production. Worked directly with clients to gather requirements, present technical solutions, and manage stakeholder expectations throughout the development lifecycle.

EDUCATION

Bachelor of Science in Computer Science

ETH Zurich (Swiss Federal Institute of Technology)

Zurich, Switzerland

Graduated June 2012

OPEN SOURCE CONTRIBUTIONS AND PROJECTS

<https://github.com/marcus-keller/react-data-table>

A performant data table component library for React that handles large datasets efficiently. Built with TypeScript and published on NPM with 2,400 weekly downloads.

<https://github.com/marcus-keller/web-performance-toolkit>

A collection of utilities for measuring and optimizing web performance metrics, featuring real-world examples and documentation.

<https://github.com/marcus-keller/accessibility-audit-tool>

An automated testing tool that integrates with CI/CD pipelines to audit web accessibility compliance based on WCAG standards.

<https://github.com/marcus-keller/nextjs-template>

A production-ready Next.js starter template with TypeScript, testing setup, and best practices baked in.
