PROFESSIONAL SUMMARY

Principal Engineer with 7 years building distributed systems and leading technical teams across Nordic startups and established tech companies. I started my career as a backend developer and gradually moved into platform engineering and infrastructure architecture. I enjoy mentoring other engineers and have a track record of shipping complex systems that scale. Based in Stockholm and prefer working on problems that have clear business impact.

WORK EXPERIENCE

Principal Engineer

TechVault Solutions

techvault.io

Stockholm, Sweden

March 2022 - Present

Led the platform engineering team through a major infrastructure migration from monolithic application to microservices architecture reducing deployment time by 65 percent

Designed and implemented a distributed tracing system using OpenTelemetry that improved production incident response time from 45 minutes to 12 minutes on average

Established engineering standards and code review processes that reduced production incidents by 40 percent over 18 months

Mentored 4 junior and mid-level engineers, with 2 promoted to senior roles during my tenure

Senior Backend Engineer

DataFlow AB

dataflow.se

Stockholm, Sweden

June 2019 - February 2022

Built and maintained a real-time data processing pipeline handling 2 million events per second using Kafka and Apache Flink

Led the technical design for database sharding strategy that reduced query latency by 50 percent for our largest customers

Implemented comprehensive monitoring and alerting system using Prometheus and Grafana covering 150 plus microservices

Conducted technical interviews and hiring for backend engineering positions, contributing to team growth from 5 to 12 engineers

Backend Engineer

Nordic Cloud Ventures

nordiccloud.io

Stockholm, Sweden

January 2017 - May 2019

Developed REST APIs and event-driven services in Java and Go supporting e-commerce platform with 100 thousand daily active users

Optimized database queries and implemented Redis caching layer reducing API response times from 800ms to 120ms median

Participated in on-call rotation and resolved production incidents with average response time of 8 minutes

Collaborated with frontend and DevOps teams to establish CI CD pipeline using Jenkins and Docker

EDUCATION

Master of Science in Computer Science

Royal Institute of Technology, Stockholm

Completed 2016

TECHNICAL SKILLS

Languages: Java, Go, Python, SQL, Bash

Databases: PostgreSQL, MySQL, Redis, MongoDB, Elasticsearch

Cloud and Infrastructure: AWS, Google Cloud Platform, Kubernetes, Docker, Terraform

Messaging and Streaming: Apache Kafka, RabbitMQ, Apache Flink

Monitoring and Observability: Prometheus, Grafana, ELK Stack, OpenTelemetry

Tools and Practices: Git, Jenkins, GitLab CI, Agile, Microservices Architecture
