## PROFESSIONAL SUMMARY

Full Stack Engineer with 3 years of experience building scalable web applications using modern JavaScript frameworks and cloud technologies. I enjoy working across the entire stack, from designing responsive frontends to architecting backend services. I've worked on projects ranging from real-time analytics dashboards to e-commerce platforms, and I'm passionate about writing clean, maintainable code that solves real user problems. Currently based in Birmingham and looking to contribute to teams building meaningful products.

## WORK EXPERIENCE

Full Stack Engineer

CloudVault Solutions

cloudvault.io

Birmingham, United Kingdom

March 2022 - Present

Developed and maintained 5+ microservices using Node.js and Express, handling data processing for over 2 million daily requests with 99.5% uptime.

Built interactive React dashboards for real-time monitoring, reducing customer support tickets by 30% through improved visibility into system performance.

Implemented CI/CD pipelines using GitHub Actions and Docker, cutting deployment time from 45 minutes to 8 minutes and enabling the team to ship features twice per week.

Mentored 2 junior developers on full stack best practices, code review processes, and debugging techniques during their onboarding period.

Senior Frontend Developer

DigitalMark Ltd

digitalmark.co.uk

Birmingham, United Kingdom

July 2021 - February 2022

Created responsive single-page applications using React and TypeScript, serving 500,000+ monthly active users across desktop and mobile devices.

Optimized bundle size by 35% through code splitting and lazy loading, improving Lighthouse scores from 62 to 87 and reducing bounce rates by 12%.

Collaborated with UX designers and backend engineers to deliver 8 feature releases, participating in all phases from requirements gathering to post-launch monitoring.

Established component library with Storybook and documented 40+ reusable UI components, saving the design team approximately 20 hours per sprint on implementation.

Junior Full Stack Developer

Nexus Digital Ltd

nexusdigital.net

London, United Kingdom

September 2020 - June 2021

Built REST APIs using Python Django and PostgreSQL to support mobile and web applications, handling authentication, validation, and business logic.

Contributed to frontend development using Vue.js, creating forms, data tables, and real-time notification systems that improved user engagement by 18%.

Fixed bugs and implemented feature requests from the product backlog, with an average resolution time of 2 days and customer satisfaction rating of 4.8/5.

Participated in daily standups and sprint planning ceremonies, delivering assigned tasks on time for 8 consecutive sprints without blockers.

## EDUCATION

---

Bachelor of Science in Computer Science

Aston University

Birmingham, United Kingdom

Graduated: June 2020

Grade: Upper Second Class Honours (2:1)

## TECHNICAL SKILLS

---

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Vue.js, Redux, Webpack, Tailwind CSS, Material-UI, Responsive Design

Backend: Node.js, Express, Django, RESTful APIs, GraphQL, PostgreSQL, MongoDB

Tools and Platforms: Docker, GitHub, Git, Jenkins, GitHub Actions, AWS (EC2, S3, RDS), Firebase

Databases: PostgreSQL, MongoDB, Redis

Testing: Jest, Mocha, React Testing Library, Pytest

Other: Agile/Scrum, Linux, Nginx, Webpack, Storybook

## NOTABLE PUBLIC REPOSITORIES

---

[github.com/jamesmitchell92/expense-tracker](https://github.com/jamesmitchell92/expense-tracker) - Full stack expense management app using React and Node.js with JWT authentication and MongoDB

[github.com/jamesmitchell92/weather-dashboard](https://github.com/jamesmitchell92/weather-dashboard) - Real-time weather dashboard consuming OpenWeather API, built with Vue.js and Chart.js

[github.com/jamesmitchell92/task-api](https://github.com/jamesmitchell92/task-api) - RESTful task management API using Django and PostgreSQL with comprehensive test coverage
