PROFESSIONAL SUMMARY

I'm a junior software engineer based in Berlin with one year of professional experience building web applications. I started my career working with React and Node.js, and I'm most interested in backend development and database design. I enjoy solving practical problems and learning from more experienced developers on my team.

WORK EXPERIENCE

Software Engineer

TechVenture Solutions

techventure.io

Berlin, Germany

March 2023 - Present

Developed and maintained React components for customer-facing web applications used by over 5,000 active users

Implemented API endpoints using Node.js and Express to handle user authentication and data management

Participated in code reviews and contributed improvements to the team's development standards and documentation

Debugged production issues and deployed fixes within 24 hours of identification

Junior Backend Developer

DataFlow Systems

dataflow.net

Berlin, Germany

November 2022 - February 2023

Built RESTful APIs using Node.js and PostgreSQL to support mobile and web applications

Created database schemas and migration scripts for new features across three different services

Wrote unit tests and integration tests achieving 75% code coverage for backend modules

Collaborated with frontend team to design API contracts and troubleshoot integration issues

Software Engineer Intern

Innovate Digital GmbH

innovatedigital.io

Berlin, Germany

June 2022 - October 2022

Assisted in building a customer management dashboard using React and TypeScript

Fixed bugs in the legacy codebase and refactored outdated JavaScript functions

Learned version control workflows and participated in daily standup meetings with the engineering team

Created documentation for internal APIs and setup procedures for new developers

EDUCATION

Bachelor of Science in Computer Science

Technical University of Berlin

Berlin, Germany

2019 - 2022

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, HTML, CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB

Tools and Platforms: Git, Docker, Linux, npm, VS Code

Other: Agile methodologies, API design, debugging
