PROFESSIONAL SUMMARY

I'm a BI analyst with 5 years of hands-on experience transforming raw data into actionable insights for mid-size organizations. I've spent the last few years building dashboards and data pipelines that actually get used by business teams instead of gathering dust. I'm equally comfortable writing SQL queries at 3 AM to fix a report as I am presenting findings to stakeholders who don't know what a dimension is.

TECHNICAL SKILLS

Languages: SQL, Python, DAX, M

BI Tools: Power BI, Tableau, Google Analytics

Databases: SQL Server, PostgreSQL, MySQL

Cloud Platforms: Azure, Google Cloud Platform

Data Tools: Excel, Git, Jupyter Notebook

Other: ETL processes, Data modeling, SSMS, Power Query

WORK EXPERIENCE

BI Analyst

DataViz Solutions

<https://dataviz-solutions.io>

Paris, France

March 2022 - Present

Designed and maintained 15+ interactive Power BI dashboards serving 200+ end users across sales, marketing, and finance departments

Built automated ETL pipelines using SQL Server Integration Services to refresh data daily, reducing manual reporting time by 8 hours weekly

Collaborated with product managers to translate business requirements into technical specifications and created documentation for 12 new data models

Identified and resolved performance issues in existing dashboards, improving load times by 40% through query optimization and data compression

Senior BI Developer

InsightHub Analytics

<https://insighthub-analytics.net>

Paris, France

June 2020 - February 2022

Led the migration of legacy reporting infrastructure from Excel-based solutions to Tableau, enabling real-time data access for 50+ stakeholders

Developed a customer segmentation model using Python and SQL that helped the sales team increase conversion rates by 12%

Trained 8 team members on Tableau best practices and data modeling concepts, creating internal documentation that became the standard reference guide

Maintained and optimized existing Tableau workbooks, reducing refresh times from 45 minutes to 8 minutes through efficient data source connections

BI Analyst

Nexus Finance Consulting

<https://www.nexus-finance.fr>

Paris, France

January 2019 - May 2020

Created 6 comprehensive Power BI reports for banking clients, covering KPIs related to loan portfolios, customer acquisition, and operational metrics

Wrote complex SQL queries to extract and transform financial data from multiple sources, ensuring data accuracy through validation scripts

Built a financial forecasting dashboard using DAX measures and time intelligence functions, enabling executives to track quarterly projections

Supported ad hoc analysis requests from clients by querying databases and presenting findings within tight deadlines, maintaining a 95% accuracy rate

EDUCATION

Master's Degree in Business Intelligence and Data Analytics

University of Paris-Saclay

Graduated: June 2018

Bachelor's Degree in Computer Science

University of Paris-Cité

Graduated: June 2016
