PROFESSIONAL SUMMARY

Experienced data analyst with a decade of experience transforming raw data into actionable business insights across financial services and technology sectors. I've built automated reporting systems that reduced manual analysis time by 60% and developed predictive models that improved forecast accuracy. I'm comfortable working with large datasets and enjoy the problem-solving aspect of turning complex requirements into clear analytical solutions. Based in Glasgow, I've recently relocated back to Scotland after 7 years down south.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavaultsolutions.io

London, United Kingdom

November 2021 - Present

Designed and maintained a data warehouse serving 15 business units, improving query performance by 45% through optimisation of underlying schemas and indexing strategies. Led the implementation of automated daily reporting dashboards using Tableau that eliminated manual Excel-based reporting for the finance team. Conducted statistical analysis on customer behaviour datasets containing 8 million+ records to identify churn patterns and recommend retention strategies that improved customer lifetime value by 12%. Mentored three junior analysts on SQL best practices and data visualisation techniques, conducting weekly knowledge-sharing sessions.

Data Analyst

Insight Financial Group

www.insightfinancial.co.uk

London, United Kingdom

July 2017 - October 2021

Created end-to-end ETL processes using Python and SQL that consolidated data from 12 disparate systems into a unified data lake, enabling cross-functional analysis for the first time. Developed monthly financial performance reports analysing revenue, costs, and margins across 8 business lines using Excel pivot tables and Power BI. Investigated data anomalies and quality issues in transactional databases, fixing root causes that prevented £200,000+ in billing errors annually. Built a forecasting model using historical sales data that achieved 87% accuracy in predicting quarterly revenues for budget planning purposes.

Junior Data Analyst

TechCore Analytics

www.techcore-analytics.net

Edinburgh, United Kingdom

January 2015 - June 2017

Extracted and cleaned datasets from Oracle databases to support ad hoc analysis requests from marketing and operations teams, typically delivering results within 2-3 days. Produced weekly status reports summarising key performance indicators across web applications, tracking metrics like user engagement, page load times, and

system uptime. Collaborated with product managers to define data requirements and create simple dashboards in Google Data Studio for tracking feature adoption metrics. Assisted in migrating legacy reporting processes from MS Access to SQL Server, which improved data reliability and reduced report generation time from 4 hours to 15 minutes.

EDUCATION

MSc Data Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: September 2014

BSc Statistics

University of Glasgow

Glasgow, United Kingdom

Graduated: June 2013

SKILLS

Technical: SQL, Python, Tableau, Power BI, Excel, Google Data Studio, ETL, Data Warehousing, Statistical Analysis, Predictive Modelling, R, Git, Jupyter Notebooks, Oracle Database, PostgreSQL, MySQL

Analytical: Data Cleaning, Data Visualisation, Requirements Gathering, Root Cause Analysis, Forecasting, A/B Testing, Performance Optimisation, Business Intelligence

Soft Skills: Stakeholder Communication, Team Leadership, Problem Solving, Documentation, Training and Mentoring

PROFESSIONAL CERTIFICATIONS

Google Data Analytics Professional Certificate - 2020

Tableau Desktop Specialist - 2019
