PROFESSIONAL SUMMARY

Frontend engineer with 1 year of professional experience building user interfaces and web applications. I started my career at a startup in Madrid where I learned React and JavaScript by working on real projects. I'm comfortable with HTML, CSS, and modern frontend tooling, and I enjoy solving layout problems and optimizing page performance. I'm looking to grow my skills in a team environment and take on more complex feature development.

WORK EXPERIENCE

Junior Frontend Engineer

TechVision Solutions

www.techvisionsolutions.io

Madrid, Spain

March 2024 - Present

Developed new features for an internal dashboard application using React and Redux

Fixed responsive design issues across multiple browsers, ensuring layouts work correctly on mobile and desktop devices

Participated in code reviews with senior engineers and implemented feedback to improve code quality

Created reusable UI components for buttons, forms, and navigation elements that were used across three different projects

Frontend Developer Intern

DigitalFlow Marketing

www.digitalflow.net

Madrid, Spain

October 2023 - February 2024

Built landing pages and promotional websites using HTML, CSS, and vanilla JavaScript for client projects

Converted design mockups from Figma into functional web pages with pixel-perfect accuracy

Updated and maintained existing websites to fix bugs and add new features requested by clients

Assisted with website performance testing and made minor optimizations to reduce page load times

Junior Web Developer

EduConnect Online Platform

Madrid, Spain

June 2023 - September 2023

Developed the course catalog interface using React, displaying courses with filtering and search functionality

Integrated API endpoints to fetch user data and display course recommendations on the dashboard

Fixed styling issues and improved the visual consistency of the platform across different pages

Wrote and maintained unit tests for React components using Jest to ensure code reliability

EDUCATION

Degree in Web Development and Front-End Technologies

Universidad Autónoma de Madrid (UAM)

Madrid, Spain

Graduated: June 2023

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Frontend Frameworks: React, Redux

Tools and Platforms: Git, npm, webpack, Figma, VS Code

Testing: Jest, React Testing Library

Other: REST APIs, responsive design, browser developer tools
