PROFESSIONAL SUMMARY

I'm a data engineer with 10 years of hands-on experience building and maintaining large-scale data infrastructure. I started my career processing financial data pipelines and have since specialized in designing cloud-based ETL systems that handle billions of records daily. I'm comfortable working across the full stack, from infrastructure automation to SQL optimization, and I enjoy mentoring junior engineers to help them grow their technical foundations.

WORK EXPERIENCE

Senior Data Engineer

DataFlow Systems

www.dataflow-systems.io

Paris, France

March 2021 - Present

Architected a real-time data streaming platform using Apache Kafka and Spark that reduced data latency from 4 hours to 15 minutes for 200+ downstream consumers

Led the migration of legacy batch jobs from on-premise Hadoop to AWS EMR, reducing operational costs by 40% while improving job reliability

Mentored a team of 4 junior data engineers on best practices in schema design, data quality testing, and performance optimization

Established data governance standards and implemented automated lineage tracking across 300+ data pipelines using Apache Atlas

Data Engineer

Quantix Analytics

www.quantix-analytics.net

Paris, France

June 2017 - February 2021

Designed and deployed ETL pipelines processing 500GB of daily financial market data using Python, Scala, and PySpark

Built a data lake on S3 with partitioning and compression strategies that improved query performance by 60% and reduced storage costs significantly

Developed monitoring and alerting systems using Prometheus and Grafana to catch data quality issues before they affected business decisions

Collaborated with data scientists to optimize feature engineering pipelines, reducing computation time from 8 hours to 45 minutes

Junior Data Engineer

Insight Solutions

www.insight-solutions.co

Lyon, France

January 2014 - May 2017

Created daily ETL jobs using Python and SQL to extract data from multiple sources and load into a centralized PostgreSQL data warehouse

Built dashboards and ad-hoc reports in Tableau to support business intelligence needs across marketing and finance departments

Optimized slow-running SQL queries, reducing execution time by up to 70% through indexing and query restructuring

Documented data schemas and ETL processes to enable knowledge sharing across the analytics team

EDUCATION

Master's Degree in Computer Science, Data Systems Track

Universite Pierre et Marie Curie (UPMC)

Paris, France

Graduated: June 2013

Bachelor's Degree in Mathematics and Computer Science

Universite Paris Diderot

Paris, France

Graduated: June 2011

TECHNICAL SKILLS

Languages: Python, Scala, SQL, Bash

Big Data Technologies: Apache Spark, Apache Hadoop, Apache Kafka, Apache Airflow

Cloud Platforms: AWS (EC2, S3, EMR, RDS, Glue), Google Cloud Platform (BigQuery, Dataflow)

Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch, Cassandra

Data Warehousing: Snowflake, Redshift, Hive

Data Quality and Testing: Great Expectations, dbt, pytest

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Version Control: Git, GitHub, GitLab

Container Technologies: Docker, Kubernetes

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (2019)

Google Cloud Professional Data Engineer (2020)
