PROFESSIONAL SUMMARY

Full Stack Engineer with 1 year of hands-on experience building web applications using modern JavaScript frameworks and cloud infrastructure. I've contributed to backend services and frontend interfaces at small startups in Birmingham, learning quickly through pair programming and code reviews. I'm particularly interested in improving database performance and writing cleaner code. Looking to deepen my knowledge of system design while working on projects that solve real problems for users.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React, Vue.js, CSS Flexbox, responsive design

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, AWS (EC2, S3), Linux

Other: Agile/Scrum, RESTful API design, unit testing with Jest

WORK EXPERIENCE

Junior Full Stack Engineer

TechStart Solutions

<https://techstartsolutions.io>

Birmingham, United Kingdom

June 2023 - Present

Built and maintained React components for customer-facing dashboard that displays real-time analytics for over 200 users

Developed Node.js API endpoints for user authentication and data retrieval, reducing query times by 35% through database indexing

Containerized application services using Docker and deployed to AWS EC2 instances, reducing setup time for new developers from 4 hours to 15 minutes

Participated in daily standups and sprint planning, contributing to feature estimation and identifying technical blockers early

Junior Frontend Developer

Digital Agency Birmingham

<https://digitalagencybirmingham.co>

Birmingham, United Kingdom

March 2023 - May 2023

Converted 15+ Figma design mockups into responsive Vue.js components with pixel-perfect accuracy across mobile and desktop

Fixed critical bugs in legacy jQuery codebase affecting 8 client websites, including form validation and cross-browser compatibility issues

Wrote unit tests using Jest achieving 72% code coverage for newly developed features

Collaborated with senior developers during code reviews, implementing feedback to improve code readability and maintainability

Web Development Intern

Creative Web Studio

<https://creativewebstudio.net>

Birmingham, United Kingdom

July 2022 - February 2023

Built static websites using HTML5, CSS3 and vanilla JavaScript for 6 small business clients

Maintained client websites post-launch, fixing bugs and implementing minor feature requests within 48 hours

Learned Git version control and GitHub workflows through mentorship, managing feature branches and creating pull requests

Assisted in client meetings to gather requirements and understand project scope, providing technical feasibility insights

EDUCATION

Bachelor of Science in Computer Science

Aston University

Birmingham, United Kingdom

Graduated: June 2022

PROJECTS

Chat Application (github.com/jamesmitchell92/chat-app)

Full stack real-time messaging app built with React and Node.js, using Socket.io for WebSocket communication and MongoDB for message storage

Weather Dashboard (github.com/jamesmitchell92/weather-dashboard)

Single page application displaying weather forecasts using OpenWeatherMap API, built with Vue.js and styled with Tailwind CSS

Task Manager API (github.com/jamesmitchell92/task-api)

RESTful API built with Express.js and PostgreSQL, featuring authentication, task CRUD operations, and comprehensive API documentation

CERTIFICATIONS

AWS Certified Cloud Practitioner (In Progress)

freeCodeCamp Responsive Web Design Certificate, 2022
