PROFESSIONAL SUMMARY

Data analyst with 2 years of experience transforming raw data into actionable insights for business teams. I started my career working with SQL and Python to build dashboards and reports, and I've developed a strong foundation in data cleaning and visualization. I'm particularly interested in exploring patterns in customer behavior and improving reporting processes. Currently looking to deepen my skills in advanced analytics while contributing to projects that have real business impact.

TECHNICAL SKILLS

Database Languages: SQL, PostgreSQL, MySQL

Programming Languages: Python, R

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Tools and Platforms: Excel, Google Sheets, Google Analytics, Looker

Data Processing: Pandas, NumPy, Data Cleaning

Other: Git, Basic Statistics, Excel Pivot Tables

WORK EXPERIENCE

Junior Data Analyst

TechVision Solutions

www.techvisionsolutions.io

Lisbon, Portugal

March 2023 - Present

Designed and maintained 8 interactive Tableau dashboards tracking KPIs for marketing and sales teams, reducing reporting time by 40 percent.

Wrote SQL queries to extract and analyze customer transaction data from PostgreSQL databases, supporting monthly business reviews and strategic planning.

Cleaned and processed raw datasets using Python and Pandas, identifying and resolving data quality issues that improved accuracy of downstream reports.

Collaborated with product managers to understand data requirements and delivered custom reports that informed decisions on feature prioritization.

Data Analyst Intern

DataFlow Insights

www.dataflowinsights.net

Lisbon, Portugal

June 2022 - February 2023

Created 15 Power BI reports for the finance department covering budget tracking, expense analysis, and departmental spending patterns.

Built Python scripts to automate weekly data extraction from multiple sources, saving the team approximately 6 hours of manual work each week.

Analyzed user engagement metrics from Google Analytics to identify drop-off points in the customer journey, presenting findings to the marketing team.

Assisted senior analysts in developing SQL queries and participated in data validation processes to ensure accuracy of financial reports.

Data Entry and Analysis Assistant

Lisbon City Analytics

www.lisboncityanalytics.co

Lisbon, Portugal

January 2022 - May 2022

Entered and validated survey data for urban mobility research using Excel spreadsheets, processing over 5000 records with 98 percent accuracy.

Created summary tables and basic charts in Excel to visualize trends in public transportation usage across different Lisbon neighborhoods.

Supported data collection efforts for 3 separate municipal research projects and maintained organized file systems for team access.

Learned fundamentals of data analysis and gained exposure to various analytical tools used by the research team.

EDUCATION

Bachelor of Science in Computer Science

Instituto Superior Técnico, University of Lisbon

Lisbon, Portugal

Graduated: June 2021

Relevant Coursework: Database Management, Statistics, Algorithms, Data Structures

GITHUB REPOSITORIES

github.com/joaomsilva/customer-churn-analysis

Customer churn prediction model using Python and Scikit-learn with exploratory data analysis on telecommunications dataset.

github.com/joaomsilva/sales-dashboard-sql

Collection of SQL queries and Tableau dashboard source files for sales performance tracking and trend analysis.

github.com/joaomsilva/data-cleaning-pipeline

Python pipeline for cleaning and transforming messy CSV files with detailed documentation and example datasets.

github.com/joaomsilva/web-scraping-portfolio

Web scraping project using BeautifulSoup and Selenium to collect and analyze pricing data from e-commerce websites.

CERTIFICATIONS

Google Data Analytics Professional Certificate

Completed: December 2021

Python for Data Analysis Online Course

Completed: August 2022
