## PROFESSIONAL SUMMARY

---

I'm a frontend engineer with 7 years of experience building scalable web applications for fast-paced tech companies. I've spent the last few years focused on performance optimization and mentoring junior developers. I enjoy solving complex UI problems and have a particular passion for accessible design that works across different devices.

## WORK EXPERIENCE

---

Senior Frontend Engineer

Velocity Labs

[www.velocitylabs.io](http://www.velocitylabs.io)

London, United Kingdom

March 2022 - Present

Rebuilt the entire payment dashboard using React and TypeScript, reducing load time from 4.2 seconds to 1.1 seconds through code splitting and lazy loading techniques.

Implemented a comprehensive component library with 60+ reusable components, establishing design patterns that reduced development time by 30% across the team.

Mentored 4 junior frontend developers, conducting weekly code reviews and pairing sessions that improved code quality standards across the team.

Led the migration from Redux to Zustand for state management, resulting in simpler codebase and faster feature delivery without breaking production.

Frontend Engineer

Digital Forge

[www.digitalforge.co](http://www.digitalforge.co)

London, United Kingdom

July 2019 - February 2022

Developed customer-facing features for a SaaS platform serving 50,000+ active users using React, Vue.js, and vanilla JavaScript.

Optimized bundle size by 45% through webpack configuration improvements and removal of unused dependencies, significantly improving Core Web Vitals scores.

Introduced automated testing practices with Jest and React Testing Library, increasing test coverage from 23% to 78% over 12 months.

Collaborated with UX designers to implement responsive designs that improved mobile conversion rates by 18%.

Junior Frontend Developer

Nexus Interactive

[www.nexusinteractive.net](http://www.nexusinteractive.net)

London, United Kingdom

June 2017 - June 2019

Built interactive features using HTML5, CSS3, and jQuery for a media publishing platform with over 2 million monthly users.

Fixed cross-browser compatibility issues and implemented CSS preprocessors to streamline styling workflows across projects.

Participated in agile sprint planning and delivered features within tight deadlines while maintaining code quality standards.

Developed expertise in browser developer tools and performance profiling to diagnose and resolve frontend bottlenecks.

## EDUCATION

---

BSc Computer Science (2:1)

University of Bristol

Bristol, United Kingdom

Graduated: June 2017

## TECHNICAL SKILLS

---

Languages and Frameworks: JavaScript, TypeScript, React, Vue.js, HTML5, CSS3, SCSS

State Management: Zustand, Redux, Context API

Tools and Bundlers: Webpack, Vite, npm, yarn, Git

Testing: Jest, React Testing Library, Cypress, Vitest

UI Libraries: Material-UI, Tailwind CSS, Bootstrap

Performance and Accessibility: Core Web Vitals, WCAG 2.1, Lighthouse, axe DevTools

API Integration: REST, GraphQL, Fetch API, Axios

Version Control: Git, GitHub, GitLab

Agile: Scrum, Kanban, Jira, Confluence

## ADDITIONAL INFORMATION

---

Actively contribute to internal tech talks and document best practices for the team

Maintained a 99.2% uptime record on production applications through careful deployment strategies

Strong communicator who translates technical concepts for non-technical stakeholders
