## PROFESSIONAL SUMMARY

---

I'm a data scientist with six years of experience building machine learning systems that solve real business problems. I've spent most of my career working on predictive models and data pipelines at fast-growing tech companies, moving from individual contributor work into a senior role where I now mentor junior team members and shape technical strategy. I'm particularly strong with Python, cloud infrastructure, and turning messy datasets into actionable insights.

## WORK EXPERIENCE

---

Senior Data Scientist

Insightful Analytics Ltd

Bristol, United Kingdom

[www.insightfulanalytics.co](http://www.insightfulanalytics.co)

January 2022 - Present

Led the development of a customer churn prediction model that identified at-risk accounts with 87% accuracy, directly contributing to a 2.3 million pound revenue retention programme. Mentored three junior data scientists, establishing code review standards and best practices that reduced model deployment time by 40%. Architected a real-time recommendation engine processing 500,000 user interactions daily across AWS Lambda and RDS, serving 2.5 million API requests monthly. Presented quarterly findings to C-level stakeholders and translated business requirements into technical specifications for cross-functional product teams.

Data Scientist

DataFlow Systems

Manchester, United Kingdom

[www.dataflowsystems.io](http://www.dataflowsystems.io)

June 2019 - December 2021

Built and maintained Python-based ETL pipelines processing 40GB of daily transaction data from multiple banking partners, ensuring 99.9% uptime. Developed a time series forecasting model for inventory optimization that reduced stockouts by 35% across a network of 200 retail locations. Conducted statistical analysis on A/B testing experiments for a mobile application with 1.2 million monthly active users, providing weekly insights to the product team. Implemented automated model monitoring and retraining workflows using Python and Airflow, cutting manual intervention by 60%.

Junior Data Scientist

TechVenture Solutions

London, United Kingdom

[www.techventuresolutions.net](http://www.techventuresolutions.net)

September 2018 - May 2019

Cleaned and explored large datasets using SQL and Pandas, supporting the development of classification models for fraud detection in payment processing. Created interactive dashboards in Tableau to visualize model performance metrics for non-technical stakeholders. Participated in Kaggle competitions and documented findings

in technical reports that informed feature engineering decisions. Assisted senior team members with feature selection and hyperparameter tuning across multiple machine learning projects.

## EDUCATION

---

MSc Data Science

University of Bristol

Bristol, United Kingdom

Graduated: September 2018

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2016

## TECHNICAL SKILLS

---

Programming Languages: Python, SQL, R, Scala

Machine Learning: Scikit-Learn, TensorFlow, XGBoost, LightGBM, Linear Regression, Classification, Time Series Forecasting, Clustering

Data Engineering: Apache Spark, Airflow, SQL Server, PostgreSQL, ETL Pipeline Development

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, SageMaker), Google Cloud Platform

Data Visualization: Tableau, Matplotlib, Seaborn, Plotly

Tools and Technologies: Jupyter Notebook, Git, Docker, Linux, Bash

Statistical Methods: Hypothesis Testing, A/B Testing, Experimental Design, Bayesian Analysis
