PROFESSIONAL SUMMARY

I'm a backend engineer with 5 years of experience building scalable APIs and microservices that handle millions of requests daily. I've worked across different company sizes, from startups to established tech firms, and I enjoy solving complex infrastructure problems. I'm particularly passionate about designing systems that are both performant and maintainable, and I'm always looking to learn new technologies that make distributed systems easier to work with.

WORK EXPERIENCE

Senior Backend Developer

TechFlow Solutions

techflow.io

Madrid, Spain

March 2023 - Present

Designed and implemented a microservices architecture that reduced API response times by 40% and improved system reliability to 99.8% uptime. Led the migration of legacy monolithic services to containerized applications using Docker and Kubernetes, managing deployments across 15 different services. Mentored two junior developers on best practices for API design and code quality, conducting weekly code reviews and technical discussions. Built an event-driven system using RabbitMQ that processes over 500,000 messages daily with zero data loss across multiple business units.

Backend Engineer

DataStream Analytics

datastream.net

Madrid, Spain

August 2021 - February 2023

Developed REST APIs in Python and Go that served 50+ internal and external clients, handling 2 million requests per day with sub-100ms latency. Implemented comprehensive database optimization strategies that reduced query execution time by 60%, improving overall application performance significantly. Created automated testing frameworks that increased code coverage from 45% to 85%, catching critical bugs before production deployment. Collaborated with DevOps engineers to establish CI/CD pipelines using Jenkins and GitLab, reducing deployment time from 2 hours to 15 minutes.

Junior Backend Developer

Nexus Systems

nexus.co

Barcelona, Spain

June 2019 - July 2021

Built RESTful APIs and backend services in Java and Node.js that powered the company's main product platform serving 100,000+ users. Worked on database design and optimization using PostgreSQL and MongoDB, implementing proper indexing strategies and query optimization. Participated in agile development cycles with

sprint planning, daily standups, and bi-weekly releases with continuous monitoring. Fixed critical production bugs and implemented hotfixes within SLAs, while maintaining detailed documentation for all backend services and APIs.

EDUCATION

Bachelor of Science in Computer Science

Universitat Politècnica de Catalunya (UPC)

Barcelona, Spain

Graduated: June 2019

SKILLS

Languages: Python, Java, Go, JavaScript, SQL

Databases: PostgreSQL, MongoDB, Redis, MySQL

Frameworks: FastAPI, Spring Boot, Express.js, Django

Cloud Platforms: AWS (EC2, RDS, S3, Lambda), Google Cloud Platform

DevOps: Docker, Kubernetes, Jenkins, GitLab CI/CD

Message Brokers: RabbitMQ, Apache Kafka

APIs: REST, GraphQL, gRPC

Testing: JUnit, Pytest, Jest, Postman

Tools: Git, Linux, Nginx, Terraform
