## PROFESSIONAL SUMMARY

Full Stack Engineer with 3 years of hands-on experience building web applications using React and Node.js. I've spent most of my career at early-stage startups where I've learned to wear multiple hats and ship features quickly without sacrificing quality. I'm based in Edinburgh and enjoy solving problems on both the frontend and backend, though I'm gradually specializing more in backend architecture. I'm looking for a role where I can contribute to meaningful products while continuing to develop my skills in system design and cloud infrastructure.

## WORK EXPERIENCE

Senior Full Stack Engineer

TechFlow Solutions Ltd

techflow.io

Edinburgh, United Kingdom

March 2023 - Present

Rebuilt the payment processing module using Node.js and PostgreSQL, reducing transaction processing time by 40% and handling 10x higher throughput than the previous system. Designed and implemented a caching layer with Redis that improved API response times from 800ms to 120ms for frequently accessed endpoints. Led the migration of the frontend from Vue.js to React, modernizing the codebase and onboarding three junior developers onto the new tech stack. Worked closely with product and design teams to deliver a customer dashboard that reduced support tickets by 25% through improved self-service functionality.

Full Stack Developer

Momentum Digital

momentum.co.net

Edinburgh, United Kingdom

September 2021 - February 2023

Built and maintained customer-facing features using React, Express, and MongoDB across a SaaS platform serving 500+ active users. Implemented automated testing suite covering both unit and integration tests, increasing code coverage from 35% to 78% and catching bugs before production deployment. Deployed and maintained AWS infrastructure using CloudFormation, managing RDS databases and S3 storage for a distributed team across Europe. Collaborated with the product manager to redesign the onboarding flow, which increased free-to-paid conversion rate from 8% to 14%.

Junior Full Stack Developer

Digital Craft Agency

digitalcraft.io

Edinburgh, United Kingdom

June 2020 - August 2021

Developed client websites using JavaScript, React, and Node.js for 12 different projects, delivering work on time and within scope for small-to-medium businesses. Maintained and enhanced a custom CMS built with Express and MongoDB, fixing bugs and implementing new features based on client feedback. Participated in code reviews and pair programming sessions with senior developers, significantly improving code quality and learning best practices.

for scalable application design. Assisted in the deployment and support of client applications on Heroku and AWS, gaining practical experience with DevOps fundamentals and continuous integration pipelines.

## EDUCATION

---

BSc Computing Science  
University of Edinburgh  
Edinburgh, United Kingdom  
Graduated June 2020

## SKILLS

---

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Redux, Material-UI, CSS Modules, Responsive Design

Backend: Node.js, Express, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis

Cloud and DevOps: AWS (EC2, RDS, S3, CloudFormation), Docker, Linux, Git, CI/CD Pipelines

Testing: Jest, React Testing Library, Mocha, Postman

Tools and Platforms: VS Code, Figma, Jira, GitHub, npm, Webpack
