PROFESSIONAL SUMMARY

Data analyst with 12 years of experience translating complex datasets into actionable business insights. Specialise in financial services and healthcare analytics where I've helped teams make faster, more confident decisions using SQL and Python. I've built dashboards that reduced reporting time by weeks and identified cost-saving opportunities worth millions. Genuinely enjoy the detective work of finding patterns in data that others miss.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavault.io

Manchester, United Kingdom

March 2020 - Present

Managed analytics for 15+ enterprise clients across financial services, designing and maintaining 40 SQL-based reporting systems that deliver daily metrics to executive stakeholders. Mentored a team of 3 junior analysts, conducting code reviews and establishing best practices that reduced query runtime by 35%. Migrated legacy reporting infrastructure from Excel to cloud-based analytics platform, eliminating manual processes and saving approximately 120 hours annually. Built predictive models using Python to forecast client churn, achieving 82% accuracy and enabling proactive retention strategies.

Analytics Manager

Insight Financial Group

www.insightfinancial.co.uk

Leeds, United Kingdom

January 2017 - February 2020

Led the analytics team through a complete data warehouse redesign, managing the transition of 200+ reports across multiple systems with zero downtime. Developed advanced dashboards in Tableau that gave the finance team real-time visibility into cash flow and revenue trends, helping identify a £2.3m accounting discrepancy. Trained 8 non-technical stakeholders in self-service analytics tools, reducing dependency on the analytics team for routine reports. Established data governance framework and documentation standards that improved data quality scores from 76% to 94%.

Data Analyst

Hartley Business Consultancy

www.hartleybc.net

Manchester, United Kingdom

June 2012 - December 2016

Created and maintained 25+ analytical reports for clients across healthcare, retail, and manufacturing sectors using SQL Server and Excel. Performed statistical analysis and hypothesis testing to support business decisions, presenting findings to C-level executives and board members. Automated 6 recurring monthly reports, reducing manual effort by 15 hours per month and improving accuracy through standardised logic. Worked closely with database administrators to optimise slow-running queries, improving dashboard load times by 45%.

EDUCATION

BSc Statistics

University of Manchester

Manchester, United Kingdom

Graduated: June 2012
