PROFESSIONAL SUMMARY

I'm a hands-on DevOps engineer with 7 years building and maintaining infrastructure for high-traffic applications. Started my career managing on-premises servers and gradually moved into cloud-native architecture, containerization, and infrastructure as code. I thrive on solving deployment problems and helping development teams move faster without sacrificing stability. Based in Manchester and always looking to mentor junior engineers on automation best practices.

WORK EXPERIENCE

Senior DevOps Engineer

CloudScale Solutions

cloudscale.io

Manchester, United Kingdom

January 2022 - Present

Led migration of legacy monolithic applications to Kubernetes clusters, reducing infrastructure costs by 35 percent and improving deployment frequency from monthly to weekly releases. Designed and implemented CI/CD pipelines using Jenkins and GitLab CI, enabling 50 developers to deploy safely without manual intervention. Managed AWS infrastructure across multiple accounts with Terraform, maintaining 99.95 percent uptime for production systems serving 2 million daily users. Mentored three junior DevOps engineers and established internal documentation standards that reduced onboarding time from three weeks to five days.

DevOps Engineer

TechFlow Ltd

techflow.co.uk

Manchester, United Kingdom

June 2019 - December 2021

Containerized 12 microservices using Docker and deployed them to a self-managed Kubernetes cluster, cutting deployment time from 45 minutes to 8 minutes. Implemented comprehensive monitoring and alerting using Prometheus and Grafana, which helped identify and resolve performance issues before they impacted customers. Automated infrastructure provisioning with Ansible, reducing manual configuration errors and enabling the team to scale environments in hours instead of days. Worked with security team to implement secrets management using HashiCorp Vault and established automated compliance scanning in the pipeline.

DevOps Engineer

DataFlow Systems

dataflow.net

Leeds, United Kingdom

July 2017 - May 2019

Managed on-premises data center infrastructure including VMware virtualization, networking, and storage systems for a growing fintech company. Built and maintained Apache Kafka clusters handling 100 million messages daily with zero data loss during incidents. Developed Bash and Python scripts to automate repetitive operational tasks,

saving the team approximately 200 hours per year. Introduced Jenkins for continuous integration pipelines, allowing developers to test code changes automatically before production deployment.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated June 2017

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Scripting Languages: Bash, Python, Go

Databases: PostgreSQL, MySQL, MongoDB, Redis

Version Control: Git, GitLab, GitHub

Networking: VPC, Load Balancing, DNS, SSL/TLS

Message Queues: Apache Kafka, RabbitMQ, AWS SQS
