PROFESSIONAL SUMMARY

I'm a Dublin-based full stack engineer with 12 years of experience building web applications at scale. I've spent the last five years in staff-level roles mentoring junior developers and making architectural decisions that shaped our platform's evolution. I'm most comfortable working across the entire stack with React, Node.js, and PostgreSQL, though I've maintained enough DevOps knowledge to understand our infrastructure without needing to ask someone else every time.

WORK EXPERIENCE

Staff Engineer

TechVenture Solutions

www.techventuresolutions.io

Dublin, Ireland

March 2021 - Present

Designed and implemented a microservices migration strategy that reduced API response times by 40% and improved team deployment velocity from monthly to weekly releases.

Led architectural reviews and code quality standards across a team of eight engineers, establishing patterns that reduced production incidents by 35% year over year.

Mentored four junior developers through their career progression, with two promoted to mid-level positions within the organization.

Owned the modernization of our payment processing infrastructure, migrating from a monolithic system to event-driven architecture using RabbitMQ and Node.js workers.

Senior Full Stack Developer

DataStream Analytics

www.datastreamanalytics.co

Dublin, Ireland

August 2017 - February 2021

Developed and shipped a real-time analytics dashboard handling 2 million data points per minute using React, Redux, and WebSocket connections to a Node.js backend.

Reduced database query times by 55% through strategic indexing, query optimization, and implementation of Redis caching layers.

Established CI/CD pipelines using GitLab CI and Docker, enabling automated testing and deployments across staging and production environments.

Collaborated with product and design teams to implement complex filtering and visualization features that directly contributed to a 25% increase in user engagement.

Full Stack Developer

WebCore Digital

www.webcoredigital.net

Dublin, Ireland

June 2012 - July 2017

Built and maintained full-stack web applications using PHP, jQuery, and MySQL, serving over 500,000 monthly active users across multiple client projects.

Implemented responsive design patterns and progressive enhancement techniques to ensure applications functioned reliably across browsers and devices from 2012 onwards.

Managed database schema design and optimization, writing complex SQL queries and stored procedures to support reporting and analytics features.

Participated in daily standups and sprint planning while maintaining clear communication with clients about project progress and technical constraints.

EDUCATION

Bachelor of Science in Computer Science

University College Dublin

Dublin, Ireland

2008 - 2012

SKILLS

Frontend Development: React, Vue.js, HTML5, CSS3, JavaScript ES6+, Redux, Webpack

Backend Development: Node.js, Express.js, PHP, RESTful API Design, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps and Infrastructure: Docker, Kubernetes, GitLab CI, AWS, Linux

Testing: Jest, Mocha, Chai, Integration Testing, Test-Driven Development

Tools and Platforms: Git, JIRA, Figma Collaboration, Agile Methodologies
