PROFESSIONAL SUMMARY

Mid-level frontend engineer with 5 years of experience building responsive web applications and component libraries. I've worked on both early-stage startups and established tech companies, developing a solid foundation in React, TypeScript, and modern CSS. I'm particularly interested in creating intuitive user interfaces and improving application performance. When I'm not coding, I enjoy contributing to open source projects and mentoring junior developers on my team.

WORK EXPERIENCE

Frontend Engineer

TechFlow Solutions

<https://techflow.io>

Madrid, Spain

March 2022 - Present

Developed and maintained 15+ reusable React components using TypeScript and Storybook, reducing development time for new features by 30%.

Implemented responsive design patterns across the application using CSS Grid and Flexbox, improving mobile usability scores from 62 to 89.

Optimized bundle size by 45% through code splitting, lazy loading, and analyzing dependencies with webpack-bundle-analyzer.

Collaborated with UX designers to refine user flows and conducted code reviews for 4 junior developers, providing constructive feedback on accessibility standards.

Senior Frontend Developer

Digital Ventures Spain

<https://digitalventures.es>

Madrid, Spain

June 2020 - February 2022

Led migration of legacy Angular application to React with Redux, improving load time from 8 seconds to 2.3 seconds for initial page render.

Built a custom authentication system using JWT tokens and React Context API, replacing third-party solution and reducing monthly costs by 2000 euros.

Established frontend testing practices with Jest and React Testing Library, achieving 78% code coverage across the codebase.

Mentored 2 junior developers and conducted weekly frontend architecture discussions to maintain code quality standards.

Junior Frontend Developer

Innovatech Madrid

<https://innovatech.co>

Madrid, Spain

July 2019 - May 2020

Built interactive dashboards using React and D3.js for data visualization, handling datasets with over 100,000 records efficiently.

Fixed critical bugs in production environment and implemented monitoring with Sentry to catch frontend errors in real time.

Collaborated with backend team using REST APIs and GraphQL, documenting API contracts to improve integration workflow.

Participated in daily standups and sprint planning using Agile methodology, delivering features on schedule for 12 consecutive sprints.

EDUCATION

Degree in Computer Science

Universidad Autónoma de Madrid

Madrid, Spain

Graduated: June 2019

TECHNICAL SKILLS

JavaScript, TypeScript, React, Redux, Vue.js, HTML5, CSS3, SASS, Webpack, Vite, Git, REST APIs, GraphQL, Jest, React Testing Library, Storybook, Figma, npm, Responsive Design, Web Performance Optimization, Accessibility WCAG 2.1

PUBLIC REPOSITORIES

<https://github.com/amoralesgarcia/react-form-validator> - Lightweight React form validation library with zero dependencies, 240 stars

<https://github.com/amoralesgarcia/color-palette-generator> - CLI tool for generating accessible color palettes from a base color, 156 stars

<https://github.com/amoralesgarcia/ui-component-library> - Collection of 25 reusable React components with TypeScript and comprehensive documentation

<https://github.com/amoralesgarcia/website-performance-audit> - Automated script for auditing frontend performance metrics and generating HTML reports
