PROFESSIONAL SUMMARY

Data engineer with five years of hands-on experience building and maintaining data pipelines across startups and established companies in Madrid. I started as a junior developer working with Python, then moved into data engineering where I found my passion for designing scalable systems that process large volumes of information. I'm comfortable working with cloud platforms, relational databases, and modern ETL tools, and I enjoy solving problems that sit at the intersection of software engineering and data infrastructure.

WORK EXPERIENCE

Senior Data Engineer

DataFlow Systems

<https://www.dataflow.io>

Madrid, Spain

March 2022 - Present

Built and maintained Apache Spark jobs processing 2TB of daily data across multiple AWS regions, reducing query times by 35% through query optimization and partitioning strategies

Designed and implemented a new data warehouse architecture using Snowflake that consolidated data from twelve different source systems into a single reliable source of truth

Led the migration of legacy batch jobs from on-premises infrastructure to AWS, managing timeline and coordination across three different teams

Mentored two junior data engineers on SQL optimization techniques and introduced code review practices that reduced production incidents by 45%

Data Engineer

TechInsights Analytics

<https://www.techinsights.net>

Madrid, Spain

July 2020 - February 2022

Developed Python-based ETL pipelines using Apache Airflow to orchestrate daily data ingestion from REST APIs and databases, serving fifteen internal business users

Created and maintained SQL views and stored procedures in PostgreSQL that fed real-time dashboards for the sales and marketing departments

Implemented data quality checks and monitoring using Great Expectations, catching data anomalies before they reached downstream systems

Collaborated with data scientists to prepare datasets for machine learning models, optimizing data transformations for model training pipelines

Junior Data Engineer

CloudMetrics Solutions

<https://www.cloudmetrics.co>

Madrid, Spain

September 2019 - June 2020

Assisted in building data pipelines using Python and SQL to extract data from multiple SaaS platforms and cloud storage buckets

Wrote and tested SQL queries to perform exploratory data analysis for business intelligence reports

Helped maintain AWS S3 infrastructure and managed access permissions for team members across three projects

Participated in daily standups and sprint planning, learning agile methodologies and collaborating with backend engineers and analysts

EDUCATION

Master of Science in Computer Science

Universitat Autònoma de Barcelona

Barcelona, Spain

2017 - 2019

Bachelor of Science in Information Technology

Universidad Complutense de Madrid

Madrid, Spain

2014 - 2017

TECHNICAL SKILLS

Languages: Python, SQL, Java, Scala, Bash

Big Data and Processing: Apache Spark, Apache Airflow, Apache Kafka, PySpark

Cloud Platforms: Amazon Web Services (S3, EC2, Lambda, RDS, Redshift), Google Cloud Platform (BigQuery)

Databases: PostgreSQL, MySQL, MongoDB, Snowflake, Redshift

Data Tools and Libraries: Pandas, NumPy, Great Expectations, dbt

Version Control: Git, GitHub

Other Tools: Docker, Linux, Jupyter Notebooks, Tableau
