PROFESSIONAL SUMMARY

I'm a Data Analyst with two years of experience building SQL queries and creating dashboards that help stakeholders make informed decisions. I started my career without a technical background but taught myself Python and Tableau through online courses and on-the-job learning. I enjoy taking raw datasets and finding patterns that lead to actionable insights, and I'm particularly interested in how data can improve operational efficiency in growing organisations.

WORK EXPERIENCE

Junior Data Analyst

Zenith Analytics Ltd

zenithanalytics.io

Oxford, United Kingdom

March 2023 - Present

Designed and maintained 12 Tableau dashboards tracking KPIs for finance and operations teams, reducing manual reporting time by 8 hours per week

Wrote SQL queries to extract and transform customer data from PostgreSQL databases, supporting ad hoc analysis requests from 5 different departments

Identified a data quality issue in the customer database that was causing 3 percent inaccuracy in revenue reports, documented findings and recommended validation rules

Mentored one placement student on SQL fundamentals and helped them complete their first independent analysis project

Data Analyst (Contract)

Meridian Consulting Partners

meridiancp.co

London, United Kingdom

September 2022 - February 2023

Built Python scripts to automate weekly data imports from 8 different APIs, cutting manual processing time from 2 hours to 15 minutes

Created comparison reports analysing campaign performance metrics across three marketing channels, presented findings to senior stakeholders

Cleaned and standardised datasets containing 500k plus records using Excel and Python pandas to prepare data for statistical analysis

Documented all procedures and created a knowledge base article enabling junior team members to execute the same reports independently

Data Support Analyst

DataFlow Solutions

dataflowsolutions.net

Reading, United Kingdom

July 2021 - August 2022

Processed daily data uploads into SQL Server databases, ensuring 99.8 percent accuracy through systematic validation checks

Assisted senior analysts with report creation and dashboard updates, learning Tableau basics through shadowing and guided projects

Resolved 200 plus data-related support tickets from internal teams, diagnosing issues and providing solutions or escalating appropriately

Compiled monthly performance statistics and identified three process improvements that were implemented to increase efficiency

EDUCATION

Bachelor of Science in Business with Management Information Systems

Oxford Brookes University

Oxford, United Kingdom

2018 - 2021

SKILLS

Technical: SQL, Python, Tableau, Excel, PostgreSQL, Data Cleaning, ETL Processes, APIs
