PROFESSIONAL SUMMARY

I'm a junior full stack engineer based in Amsterdam with 2 years of hands-on experience building web applications from frontend to backend. I started my career working with React and Node.js at a startup, then moved into a more structured environment where I improved my backend fundamentals. I enjoy solving problems on both sides of the stack and I'm committed to writing clean, maintainable code.

WORK EXPERIENCE

Full Stack Developer

TechFlow Solutions

techflow.io

Amsterdam, Netherlands

March 2023 - Present

Developed and maintained 5+ customer-facing features using React and Express.js, collaborating closely with the product team to translate requirements into working code

Refactored legacy authentication system that reduced login response time by 40% and improved security posture

Implemented automated testing pipeline using Jest, increasing code coverage from 25% to 72% across frontend components

Participated in code reviews for 3 team members, providing constructive feedback and sharing knowledge about best practices

Junior Backend Engineer

Nexus Digital

nexus-digital.co

Amsterdam, Netherlands

September 2022 - February 2023

Built RESTful APIs using Node.js and Express to support mobile and web applications serving 50,000+ monthly users

Optimized database queries in PostgreSQL that reduced average query time from 800ms to 150ms

Designed and implemented caching strategy using Redis, improving application response times by 35%

Documented 8 internal API endpoints and created developer guides for onboarding new team members

Junior Full Stack Developer

StartupHub Amsterdam

startuphub.net

Amsterdam, Netherlands

June 2021 - August 2022

Built full stack features for a project management SaaS product using React, Node.js, and MongoDB

Deployed applications to AWS using Docker containers and managed database migrations for schema changes

Fixed 40+ production and staging bugs reported through Jira, maintaining 95% uptime

Collaborated with 2 designers to implement responsive UI components that worked across desktop, tablet, and mobile devices
