PROFESSIONAL SUMMARY

Data analyst with seven years of experience transforming raw business data into actionable insights that drive strategic decisions. I've spent the last four years at DataVault Solutions building predictive models and designing dashboards that reduced operational costs by millions. Strong background in SQL and Python, with particular expertise in healthcare and financial services datasets. I enjoy working with cross-functional teams to solve complex analytical problems and mentoring junior analysts.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavault.io

Leeds, United Kingdom

March 2021 - Present

Designed and maintained 15+ interactive Tableau dashboards providing real-time insights to C-level executives and stakeholders across three business divisions. Developed Python scripts to automate monthly reporting processes, reducing manual work by 30 hours per month and improving accuracy. Led the migration of legacy data warehouse from SQL Server to Snowflake, completing the project two months ahead of schedule with zero downtime. Mentored two junior analysts and conducted weekly training sessions on advanced SQL optimization and data visualization best practices.

Data Analyst

FinanceCore Ltd

www.financecore.co

Manchester, United Kingdom

September 2018 - February 2021

Built statistical models using Python and R to detect fraudulent transaction patterns, preventing an estimated 2.3 million pounds in losses annually. Created end-to-end ETL pipelines in Talend to integrate data from 12 different banking systems into a unified analytical layer. Performed ad-hoc analysis on customer spending behavior that informed the product team's decisions on three new feature launches. Established data quality frameworks and documented 47 data lineage maps to improve transparency across the analytics function.

Junior Data Analyst

Brighton Digital Services

www.brightondigital.net

Brighton, United Kingdom

June 2017 - August 2018

Wrote complex SQL queries against large datasets to support marketing and operations teams with monthly business reviews. Developed Excel dashboards and VBA macros to automate weekly reporting for the finance department, saving approximately 8 hours of work per week. Assisted with the implementation of Google Analytics tracking across the company website and conducted training for 12 staff members. Cleaned and validated data

from customer surveys containing 50,000+ records, identifying data quality issues that improved downstream analysis.

EDUCATION

BSc Business Analytics

University of Leeds

Leeds, United Kingdom

Graduated: July 2017

TECHNICAL SKILLS

Databases: SQL Server, PostgreSQL, Snowflake, MySQL

Programming Languages: Python, R, VBA

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

ETL Tools: Talend, Apache Airflow

Statistical Analysis: Hypothesis testing, regression analysis, time series forecasting

Cloud Platforms: AWS (RDS, S3, EC2), Google Cloud Platform

Tools and Other: Excel (advanced), Google Analytics, Git, Jira, Confluence
