PROFESSIONAL SUMMARY

I'm a BI analyst with hands-on experience translating business questions into data insights. I started my career working with dashboards and SQL queries, gradually building confidence in data modeling and visualization. I enjoy the problem-solving aspect of analytics and appreciate working closely with business teams to understand what they actually need. My goal is to continue developing my technical skills while becoming more fluent in complex data transformations.

WORK EXPERIENCE

Junior BI Analyst

DataFlow Analytics GmbH

<https://dataflow-analytics.io>

Berlin, Germany

September 2023 - Present

- Created and maintained 15+ Tableau dashboards covering sales performance, customer retention, and operational metrics for cross-functional stakeholders
- Wrote SQL queries to extract and transform data from PostgreSQL databases, supporting ad-hoc reporting requests and reducing manual reporting time by 8 hours weekly
- Collaborated with product team to design KPI tracking dashboards that revealed seasonal trends resulting in revised marketing campaign timing
- Documented data definitions and dashboard logic in Confluence, establishing baseline standards for data governance across analytics team

BI Development Intern

TechVenture Solutions

<https://techventure-solutions.net>

Berlin, Germany

March 2023 - August 2023

- Assisted senior analysts in building ETL processes using Talend to consolidate data from multiple source systems into centralized data warehouse
- Developed Excel-based financial dashboards for management review, automating previously manual consolidation processes
- Validated data quality across 12 different reporting tables and documented 23 anomalies with root cause analysis and remediation steps
- Shadowed BI team during quarterly business reviews, learning how to present data findings to non-technical stakeholders

Data Support Specialist

InsightCore Ltd

<https://insightcore.co>

Berlin, Germany

January 2023 - February 2023

- Responded to 40+ monthly data requests from business users, delivering accurate reports within 24 hour turnaround time
- Maintained data quality in CRM system by identifying and correcting 150+ incorrect customer records
- Trained 8 new team members on standard reporting tools and basic SQL query structure
- Created user guide documentation for 5 internal analytics tools with step-by-step instructions and troubleshooting tips

EDUCATION

Bachelor of Science in Business Informatics

Humboldt University of Berlin

Berlin, Germany

Graduated: July 2022

GPA: 3.1/4.0

Relevant Coursework: Data Warehousing, Database Design, Business Analytics, Data Visualization, Introduction to Machine Learning

TECHNICAL SKILLS

Data Analysis and Visualization: Tableau, Excel, Power Query

Databases and SQL: PostgreSQL, MySQL, Basic T-SQL

ETL Tools: Talend, SSIS (basic)

Programming Languages: Python (basic), R (basic)

Data Modeling: Dimensional modeling, snowflake schema

Business Intelligence: KPI design, dashboard development, data governance

Tools and Platforms: Jira, Confluence, Git, Google Analytics

Soft Skills: Stakeholder communication, documentation, problem-solving

CERTIFICATIONS

Tableau Desktop Specialist

Issued: March 2023

Google Analytics Certification

Issued: November 2022

GITHUB REPOSITORIES

github.com/marcus-weber/sales-dashboard-sql - SQL queries and data extraction scripts for building sales performance dashboards using PostgreSQL

github.com/marcus-weber/python-data-cleaner - Python utility scripts for cleaning and validating customer data with pandas

github.com/marcus-weber/tableau-viz-samples - Collection of Tableau visualization examples demonstrating best practices for dashboard design

github.com/marcus-weber/etl-documentation - Documentation and process flows for common ETL patterns used in data warehousing projects
