PROFESSIONAL SUMMARY

I'm a full stack engineer with 14 years building web applications across finance, healthcare, and e-commerce sectors. I've led teams through complex system migrations, mentored junior developers, and architected solutions serving millions of requests daily. I focus on writing maintainable code and making smart infrastructure decisions that balance performance with long-term maintainability.

WORK EXPERIENCE

Staff Engineer

Quantum Digital Solutions

www.quantumdigital.io

Dublin, Ireland

August 2021 - Present

Designed and implemented microservices architecture migration for legacy monolith, reducing deployment time from 45 minutes to 8 minutes and improving system reliability to 99.95% uptime. Led a team of five engineers through a complete database redesign that increased query performance by 340% while maintaining zero downtime. Established engineering standards and code review processes that reduced production incidents by 62% over 18 months. Mentored four junior developers, two of whom were promoted to mid-level roles within the organization.

Senior Full Stack Engineer

Velocity Technologies Ltd

www.velocity.ie

Dublin, Ireland

March 2017 - July 2021

Built and maintained customer-facing web application serving 500,000 daily active users with React frontend and Node.js backend. Implemented real-time notification system using WebSockets and Redis that delivered 99.99% message delivery rate across 200,000 concurrent connections. Designed payment processing integration with PCI DSS compliance, processing over 10 million transactions annually with zero security incidents. Reduced cloud infrastructure costs by 35% through AWS optimization and resource consolidation without sacrificing performance.

Full Stack Developer

Insight Software Group

www.insightsoftware.net

Cork, Ireland

June 2009 - February 2017

Developed healthcare management platform using Java, Spring Boot, and Angular for 50 hospitals across Ireland and UK. Implemented automated testing framework increasing code coverage from 32% to 87% and reducing bug escape rate by 50%. Created ETL pipelines to migrate 2 million patient records from legacy systems with zero data loss. Collaborated with product and design teams to deliver four major feature releases annually, consistently shipping on schedule.

EDUCATION

Bachelor of Science in Computer Science

University College Dublin

Graduated: May 2009

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3

Frontend: React, Vue.js, Redux, Next.js, Material-UI, responsive design

Backend: Node.js, Express, Spring Boot, Django, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Cloud and DevOps: AWS, Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform

Other: Git, Agile methodologies, system design, microservices architecture, relational and NoSQL databases
