PROFESSIONAL SUMMARY

I'm a backend engineer based in Dublin with 4 years of experience building scalable APIs and microservices for fintech and e-commerce platforms. I've worked with Python, Node.js, and Go to design and maintain systems handling millions of requests daily. I enjoy solving complex architectural problems and mentoring junior developers through code reviews and pair programming sessions.

WORK EXPERIENCE

Senior Backend Engineer

TechVault Systems

www.techvault.io

Dublin, Ireland

March 2023 - Present

Designed and implemented a real-time transaction processing pipeline using Go and Apache Kafka, reducing latency from 2 seconds to 200 milliseconds for payment processing

Refactored legacy Python monolith into microservices architecture, resulting in improved deployment frequency from quarterly to weekly releases

Led the migration of PostgreSQL databases to managed AWS RDS, reducing database maintenance overhead by 30 hours per month

Mentored three junior developers on backend best practices, code design patterns, and system architecture principles

Backend Engineer

FinFlow Ltd

www.finflow.co

Dublin, Ireland

June 2021 - February 2023

Built RESTful APIs using Node.js and Express to support mobile and web applications serving 50,000 daily active users

Implemented automated testing suite with Jest and Supertest, increasing test coverage from 45% to 78% across the codebase

Optimized database queries and introduced Redis caching layer, improving API response times by 40% on average

Collaborated with DevOps team to establish CI/CD pipelines using GitHub Actions and Docker, reducing deployment time from 45 minutes to 8 minutes

Junior Backend Engineer

Digital Bridge Solutions

www.digitalbridgesolutions.net

Dublin, Ireland

September 2020 - May 2021

Developed and maintained REST endpoints in Python using Flask framework for internal admin dashboard serving 200+ employees

Wrote SQL queries and managed PostgreSQL database schema migrations for new feature releases

Participated in on-call rotation, responding to production incidents and implementing hotfixes within SLA requirements

Contributed to API documentation and maintained OpenAPI specifications for improved developer experience

EDUCATION

Bachelor of Science in Computer Science

University College Dublin

Dublin, Ireland

Graduated: May 2020

TECHNICAL SKILLS

Languages: Python, JavaScript, Go, SQL

Frameworks: Flask, Express.js, FastAPI

Databases: PostgreSQL, MySQL, Redis, MongoDB

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Azure

Tools and Platforms: Docker, Kubernetes, Git, GitHub Actions, Jenkins

Message Queues: Apache Kafka, RabbitMQ

Testing: Jest, Pytest, Supertest, unittest

Other: RESTful API Design, Microservices Architecture, Linux, Nginx
