PROFESSIONAL SUMMARY

I'm a data scientist with six years of hands-on experience building machine learning systems that solve real business problems. I've spent the last three years at a fintech startup where I developed predictive models for fraud detection and customer churn, reducing losses by millions of SEK annually. I'm genuinely interested in the intersection of statistics and engineering, and I prefer working with teams that value both rigorous experimentation and practical delivery.

WORK EXPERIENCE

Senior Data Scientist

FinFlow AB, Stockholm

<https://finflow.io>

January 2022 - Present

Built and deployed a real-time fraud detection system using XGBoost and feature stores that now processes 50K+ transactions daily with 94% precision on suspicious activities

Established a data science practice from scratch by creating reusable model templates, documentation standards, and A/B testing frameworks adopted across three product teams

Mentored two junior data scientists on machine learning fundamentals, model evaluation, and production deployment, resulting in three new models launched to production

Led a migration from scikit-learn pipelines to MLflow for experiment tracking, reducing model debugging time by 60% and improving reproducibility across the team

Data Scientist

Insight Analytics AS, Stockholm

<https://insightanalytics.net>

March 2019 - December 2021

Developed customer segmentation models using K-means and hierarchical clustering that identified high-value customer profiles, enabling the marketing team to increase campaign ROI by 35%

Implemented time-series forecasting models for inventory optimization using ARIMA and Prophet, reducing excess stock holdings by 22% across 15 warehouses

Automated daily reporting dashboards using Python and Looker that replaced manual Excel processes and saved operations team 40 hours per week

Conducted statistical analyses on A/B tests for product features, providing actionable insights that informed decisions on five major feature releases

Data Analyst

TechCore Sweden AB, Västerås

<https://techcore.co>

July 2017 - February 2019

Created SQL queries to extract and transform large datasets from PostgreSQL databases, supporting analysis across finance, operations, and product teams

Built Python scripts to clean and validate data quality issues in customer databases, improving data accuracy by identifying and fixing over 200K corrupted records

Designed and presented weekly KPI dashboards to executive stakeholders tracking product adoption, revenue metrics, and operational efficiency

Performed exploratory data analysis on user behavior datasets using pandas and matplotlib, generating insights that influenced product roadmap priorities

EDUCATION

Master of Science in Data Science

KTH Royal Institute of Technology, Stockholm

Graduated: June 2017

Bachelor of Science in Statistics and Mathematics

Lund University, Lund

Graduated: May 2015

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Scala

Machine Learning: XGBoost, Random Forests, Neural Networks, scikit-learn, TensorFlow, PyTorch

Data Tools: Pandas, NumPy, PySpark, Jupyter, Looker, Tableau

Databases: PostgreSQL, BigQuery, Snowflake, MongoDB

MLOps: MLflow, Docker, Git, Jenkins, AWS SageMaker

Statistics: Hypothesis testing, Regression analysis, Time-series analysis, Experimental design

PUBLIC REPOSITORIES

github.com/erikmalm/customer-churn-predictor - End-to-end churn prediction pipeline with feature engineering, model comparison, and REST API deployment using Flask

github.com/erikmalm/anomaly-detection-framework - Unsupervised learning library for time-series anomaly detection with Isolation Forest and LSTM autoencoders

github.com/erikmalm/ab-testing-toolkit - Statistical analysis toolkit for A/B testing with power calculations, significance testing, and effect size estimation

github.com/erikmalm/data-quality-monitor - Python package for automated data quality checks and validation rules applied to production data pipelines

LANGUAGES

Swedish: Native

English: Fluent

German: Conversational
