PROFESSIONAL SUMMARY

I'm a Research Engineer with 6 years in the field, though my trajectory has been somewhat unconventional. I started in graduate roles focused on machine learning infrastructure, moved into senior research positions managing distributed systems teams, and now I'm helping organizations build scalable AI research platforms. I've always been more interested in solving hard technical problems than climbing the ladder in a traditional sense. Based in Manchester, I'm currently looking to deepen my work in applied research within fintech or healthcare sectors.

WORK EXPERIENCE

Senior Research Engineer

TechVenture Dynamics

https://www.techventuredynamics.io

Manchester, United Kingdom

September 2023 - Present

Led research initiatives on federated learning systems and privacy-preserving machine learning architectures

Supervised and mentored a team of 8 junior engineers and research associates across distributed locations

Designed and implemented novel approaches to data pipeline optimization that reduced processing time by 43 percent

Presented findings at 2 international conferences and published 1 peer-reviewed paper on differential privacy techniques

Lead Research Engineer

Quantum Insights Ltd (Previously known as DeepMind Analytics Consortium)

Manchester, United Kingdom

March 2022 - August 2023

Managed a cross-functional team of 22 engineers spanning research, infrastructure, and DevOps disciplines

Architected end-to-end machine learning platform handling 2TB of data daily across Kubernetes clusters

Directed department-wide strategic initiatives for model deployment and A/B testing frameworks

Collaborated with 5 Fortune 500 clients on custom research solutions and technical advisory work

Junior Research Engineer

ProxiData Solutions

https://www.proxidata.net

Bristol, United Kingdom

July 2018 - February 2022

Developed and maintained Python-based machine learning pipelines for time series forecasting

Contributed to internal libraries for data validation and model serving infrastructure

Implemented monitoring and alerting systems using Prometheus and Grafana for production models

Participated in weekly knowledge sharing sessions and contributed to 3 internal technical documentation projects

EDUCATION

MSc Computer Science (Machine Learning Specialisation)

University of Manchester

Manchester, United Kingdom

Graduated: September 2018

BSc Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2016

TECHNICAL SKILLS

Programming Languages: Python, Go, Scala, SQL, Java

Machine Learning Frameworks: TensorFlow, PyTorch, scikit-learn, XGBoost

Data & Infrastructure: Apache Spark, Kafka, PostgreSQL, MongoDB, Elasticsearch

Cloud Platforms: AWS, Google Cloud Platform, Azure

Containerisation & Orchestration: Docker, Kubernetes, Helm

Monitoring & Logging: Prometheus, Grafana, ELK Stack, Datadog

Other: Git, CI/CD pipelines, Jupyter notebooks, RESTful API design
