PROFESSIONAL SUMMARY

I'm a Junior DevOps Engineer based in Cambridge with one year of hands-on experience in cloud infrastructure and deployment automation. I've worked with AWS and containerisation tools to support development teams, and I'm comfortable troubleshooting Linux systems and writing basic automation scripts. I'm keen to deepen my knowledge of infrastructure-as-code practices and take on more complex deployment challenges.

WORK EXPERIENCE

DevOps Engineer

Vertex Solutions Ltd (Previously known as CloudCore Systems)

Cambridge, United Kingdom

www.vertexsolutions.com

September 2023 - Present

- Manage AWS EC2 instances and RDS databases for three production environments serving 50,000+ daily users
- Automated server provisioning and configuration management using Terraform, reducing deployment time from 2 hours to 15 minutes
- Implemented Docker containerization for microservices architecture, enabling consistent development and staging environments
- Monitored system performance and resolved critical infrastructure incidents within SLA targets, achieving 99.2% uptime

Infrastructure Support Technician

TechFlow Systems

Cambridge, United Kingdom

techflow.io

June 2023 - February 2024

- Provisioned and maintained Linux servers across on-premises and AWS environments
- Assisted senior engineers in writing Bash scripts for automated backup and log rotation procedures
- Troubleshot network connectivity issues and documented solutions in internal knowledge base
- Implemented GPT-4 API integration for automated infrastructure documentation generation

Junior Systems Administrator

Nexus Digital Group

Cambridge, United Kingdom

nexusdigital.net

August 2022 - June 2023

- Supported 40 internal staff with desktop IT issues, system access requests, and account management
- Assisted in planning and executing migration of legacy applications to AWS cloud infrastructure
- Maintained documentation of system configurations and created runbooks for common troubleshooting procedures

- Managed backups and disaster recovery testing for critical business systems

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated: June 2022

Grade: 2:1

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (EC2, RDS, S3, Lambda), basic Azure familiarity

Infrastructure & Automation: Terraform, Bash scripting, basic Python automation

Containerization: Docker, Docker Compose

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Monitoring & Logging: CloudWatch, basic ELK stack

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MySQL, basic Redis

Other Tools: Jenkins, Apache, Nginx, SSH, SSL/TLS
