PROFESSIONAL SUMMARY

Results-driven and highly motivated DevOps engineer with a proven track record of leveraging cutting-edge technologies to spearhead mission-critical infrastructure initiatives. Passionate about delivering actionable insights through data-driven decision making and cross-functional collaboration to synergistically champion organisational objectives. Demonstrated ability to innovate within dynamic environments whilst maintaining a commitment to continuous improvement and operational excellence. Seeking to further develop expertise in cloud technologies and container orchestration through strategic engagement with forward-thinking organisations.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Microsoft Azure

Containerisation: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Scripting: Bash, Python, PowerShell

Monitoring and Logging: Prometheus, Grafana, ELK Stack

Databases: PostgreSQL, MySQL, MongoDB

Web Servers: Nginx, Apache

WORK EXPERIENCE

DevOps Engineer

CloudVault Solutions

cloudvault.io

London, United Kingdom

June 2022 - Present

Designed and implemented automated CI/CD pipelines using Jenkins and GitLab CI, reducing deployment time by 40% and enabling weekly production releases across multiple microservices environments

Managed containerised applications utilising Docker and Kubernetes, orchestrating deployment of 15+ services across development, staging, and production clusters with 99.8% uptime

Implemented infrastructure as code using Terraform and CloudFormation on AWS, provisioning and maintaining 50+ cloud resources with version control and automated testing protocols

Established comprehensive monitoring and alerting systems using Prometheus and Grafana, reducing incident response time by 35% and improving system observability across the stack

Junior DevOps Engineer

DataFlow Technologies

dataflowtech.net

London, United Kingdom

January 2022 - May 2022

Assisted in the migration of legacy applications from on-premises infrastructure to AWS cloud environment, executing lift-and-shift strategy for 8 critical business systems

Developed and maintained Ansible playbooks for automated server configuration management, reducing manual provisioning time from 4 hours to 15 minutes per instance

Implemented Docker containerisation for Java and Node.js applications, creating standardised container images and reducing deployment inconsistencies by 60%

Supported infrastructure monitoring initiatives by configuring ELK Stack for centralised logging across 20+ application servers, improving troubleshooting efficiency

System Administrator

Pinnacle IT Services

pinnacleits.co

London, United Kingdom

August 2020 - December 2021

Managed Windows and Linux server environments, performing system updates, security patches, and performance optimisations across 30+ physical and virtual servers

Implemented backup and disaster recovery procedures using AWS S3 and on-premises NAS storage, achieving RPO of 24 hours and RTO of 4 hours

Provided tier 2 technical support to internal teams, resolving infrastructure-related issues and maintaining 95% ticket resolution rate within SLA

Collaborated with network team to implement network monitoring tools and conduct quarterly infrastructure audits to ensure compliance with organisational security policies

EDUCATION

BSc Computer Science

University of Sheffield

Sheffield, United Kingdom

Graduated: June 2020

GITHUB REPOSITORIES

jamespatterson92/kubernetes-deployment-automation

Production-ready Kubernetes manifests and Helm charts for multi-tier application deployment with automated scaling policies and health checks

jamespatterson92/terraform-aws-infrastructure

Reusable Terraform modules for provisioning AWS infrastructure including VPC, EC2, RDS, and load balancers with comprehensive documentation

jamespatterson92/ci-cd-pipeline-templates

GitLab CI and Jenkins pipeline configuration templates with testing, security scanning, and automated deployment stages

jamespatterson92/monitoring-stack-docker-compose

Complete Docker Compose configuration for ELK Stack, Prometheus, and Grafana with pre-configured dashboards and alerting rules
