PROFESSIONAL SUMMARY

Results-driven and highly motivated Principal Engineer with a proven track record of spearheading cutting-edge technology initiatives across dynamic organisations. Passionate about delivering value through data-driven decision making and synergistically leveraging cross-functional collaboration to drive mission-critical outcomes. Champion of innovative solutions with a keen ability to transform actionable insights into tangible organisational objectives. Committed to advancing technical excellence and fostering a culture of continuous improvement whilst maintaining alignment with strategic business goals.

WORK EXPERIENCE

Principal Engineer

TechVision Solutions Ltd

techvision.io

Bristol, United Kingdom

January 2021 - Present (3+ years)

Led architecture design and implementation of microservices platform supporting 2 million daily active users across multiple regions

Established coding standards and best practices framework adopted across 45-person engineering team, reducing code review time by 28 percent

Mentored 12 junior and mid-level engineers through structured development programmes, with 8 progressing to senior positions

Directed migration of legacy monolithic applications to cloud infrastructure, achieving 35 percent reduction in operational costs

Senior Principal Engineer

Apex Digital Group

www.apexdigitalgroup.com

London, United Kingdom

October 2020 - December 2023 (3+ years)

Architected end-to-end CI/CD pipeline improving deployment frequency from monthly to daily releases across 60 microservices

Implemented comprehensive monitoring and observability stack reducing mean time to resolution by 42 percent

Led cross-functional teams of engineers and product managers to deliver 15 major platform features within agreed timelines

Designed and delivered enterprise security protocols achieving SOC 2 Type II compliance certification

Senior Software Engineer

DataCore Systems

datacore.net

Manchester, United Kingdom

June 2015 - September 2020 (5+ years)

Built high-performance data processing pipeline handling 500GB of daily ingestion across distributed systems

Optimised database query performance through indexing strategies and query rewriting, improving application response times by 51 percent

Developed comprehensive API documentation and developer portal used by 200+ external partners

Collaborated with infrastructure team to standardise deployment procedures reducing incident response time by 38 percent

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated 2015

GPA: 2:1 Honours

TECHNICAL SKILLS

Languages: Python, Java, Go, JavaScript, SQL

Cloud Platforms: AWS, Google Cloud Platform, Azure

Containerisation: Docker, Kubernetes, OpenShift

Infrastructure as Code: Terraform, CloudFormation, ArgoCD

Databases: PostgreSQL, MongoDB, Cassandra, Redis

Messaging Systems: Apache Kafka, RabbitMQ, AWS SQS

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

Version Control: Git, GitHub Enterprise, Bitbucket

CI/CD Tools: Jenkins, GitLab CI, CircleCI

API Development: REST, GraphQL, gRPC

Agile Methodologies: Scrum, Kanban, SAFe

System Design and Architecture: Microservices, Event-driven architecture, SOLID principles

CERTIFICATIONS

AWS Certified Solutions Architect - Professional (2022)

Linux Foundation Certified Kubernetes Administrator (2021)
